TECHNOTHERM - Quality assured

Being a midsize family business owned by Lucht LHZ Elektroheizung GmbH & Co. KG, we have a discerning and comprehensive understanding of quality. In this context, it is important for us that you can absolutely rely upon our services.

We develop and manufacture our storage heating and electrical heating systems at a scrupulously high level. Our core range of electrical-heating products are Made-in-Germany. We develop and manufacture them completely and autonomously which also contributes to our success. In the last 31 years, we have established our business on the national and international markets. Now we are represented worldwide by a number of sales offices and dealers based in various countries. To secure compliance with international quality standards, we have implemented our own qualitymanagement system at our production factories in Hartmannsdorf and Burgstädt.

Regular and internal audits ensure a controlled level and an continuous improvement process. They also ensure a needs based training of our staff. We see this, in turn, as the best pre-requisite for customer satisfaction and for securing our business success.

- For 31 years, we have been a leading German Manufacturer of electrical heating products
- The highest standards assured in all areas of the business, by our quality control management team
- Sucessfully established in both national and international markets
- Development and manufacturing in Germany
- Innovative solutions for special tasks and a comprehensive product range

"Your demand is our **passion!**
Top-Quality produced in Germany!"

Uwe Lucht jun.
Managing Director

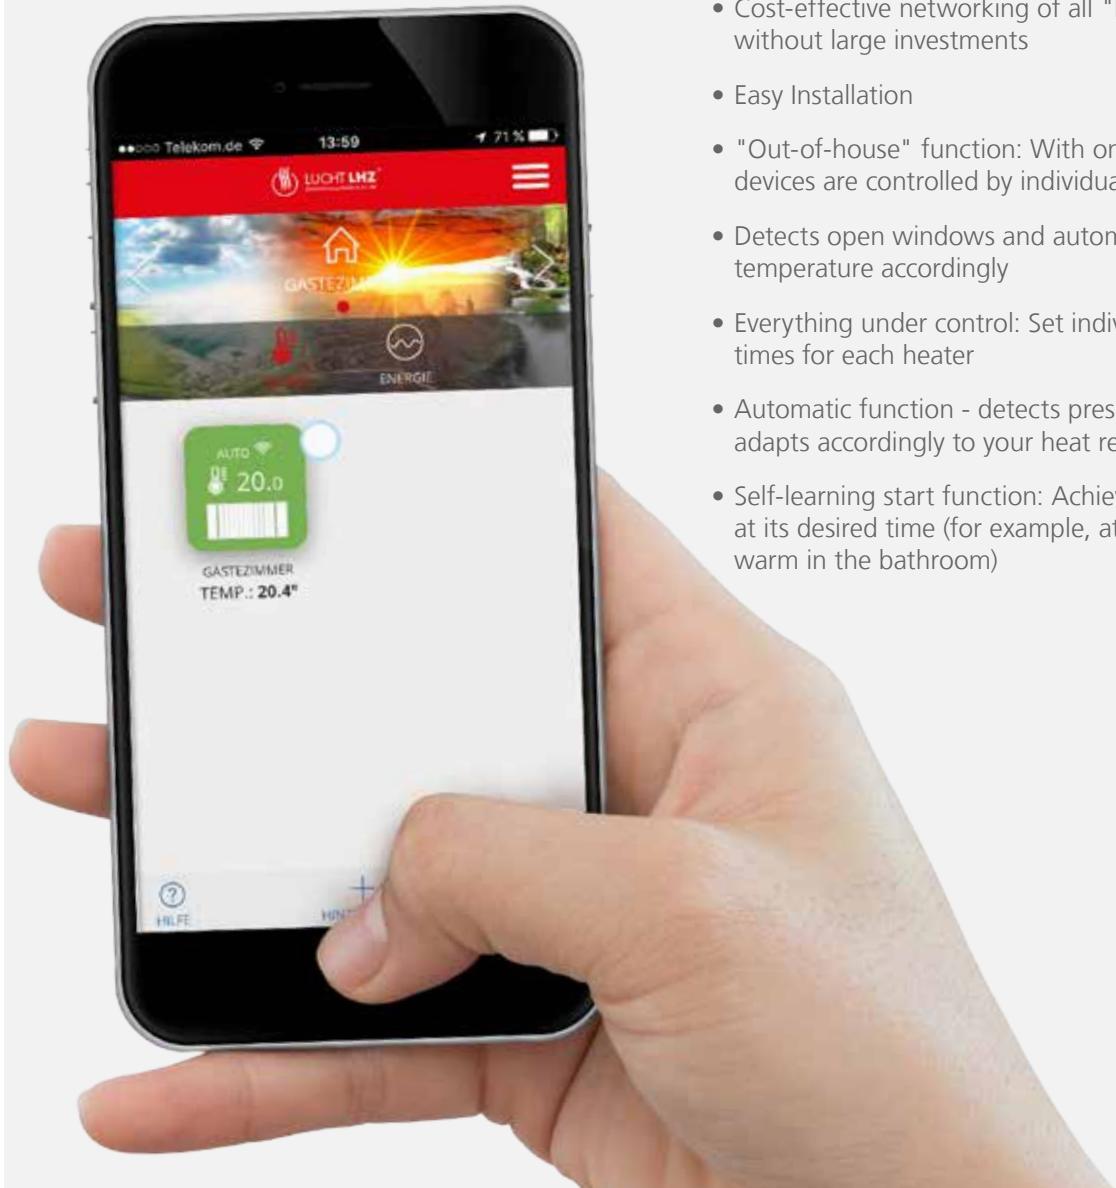

EVERYTHING IS UNDER CONTROL: THE LHZ APP

FOR ALL DEVICES WITH THE DSM THERMOSTAT

Now with voice control:

WHAT DOES THE APP DO?

- Control and regulate the temperature and operating times in your rooms
- Cost-effective networking of all "DSM" devices without large investments
- Easy Installation
- "Out-of-house" function: With only one command, all devices are controlled by individually set temperatures
- Detects open windows and automatically controls the temperature accordingly
- Everything under control: Set individual temperatures and times for each heater
- Automatic function - detects presence and absence and adapts accordingly to your heat requirement
- Self-learning start function: Achieves the set temperature at its desired time (for example, at 6:30 it should be 21°C warm in the bathroom)

▲ Monitoring of consumption and heating costs by means of illustrative curve presentation

▲ Programming the heating periods

CONTROL

- Many heaters in our range are available with the DSM thermostat
- Temperature, day, week program and individual time program
- Daily, monthly and yearly statistics

ANDROID APP BEI

App Store

DEVICES REQUIRED

- DSM interface
- Heater with DSM thermostat
- Free LHZ App

More informations at: www.technotherm.de/lhzapp

ECO-INTERFACE 1.0 – CENTRAL CONTROL MANAGEMENT

SMART-HOME-SOLUTION FOR
ALL AFFILIATED DELTA DORE DEVICES

WHAT THE ECO INTERFACE 1.0 DOES:

- Quick installation
- Easy connection to an internet router
- Intuitive use thanks to photo mode and display of rooms
- Connection of all Delta Dore devices with the TTi App
- Wireless communication with all compatible devices (TYBOX, TYXIA, TYXAL+, etc.)

ANDROID APP BEI
Google play

Laden im
App Store

WITH THE **ECO-INTERFACE**, YOU CAN **CONTROL**
YOUR HOME AUTOMATION FROM YOUR HOME
OR REMOTELY, **USING YOUR SMARTPHONE**

FUNCTIONS

- Control the room temperature in the living area
- Central switching capability for lighting
- Create individual room atmospheres
- Actuation of roller shutters and blinds
- Operation of front door, entrance gate, garage door, etc.
- Handle of the alarm center with statusdisplay

SCENARIOS

- Creation of light guiding scenarios
- Creation of individual everyday scenarios (e.g. I am on the way home: the heating is turned up, the lights are switched on, the shutters are closed, etc.)

FACTS

- Control up to 32 channels at the same time
- maintenance of up to 10 locations (apartments, second residences, shops, etc.)
- Personal design of the library, symbols and interior photos

ECO-INTERFACE 2.0 – IP/GSM TELEPHONE MODEM

SMART-HOME SOLUTION FOR CONNECTED
DEVICES AND A DELTA DORE ALARM SYSTEM

WHAT THE ECO INTERFACE 2.0 DOES:

- Control of all DeltaDore products connected to TYDOM APP
- Video analysis of triggering grounds and remote monitoring
- Receive alarms, even in the event of a power failure or loss of the Internet connection

ANDROID APP BEI
Google play

Laden im
App Store

Latest Features:

CONTROL WITH SMARTPHONES OR TABLETS.

**CONTROLLING YOUR LOCAL DEVICE AND
THE **ALARM STATION** FROM THE INTERNET**

FUNCTIONS:

- Video function (with motion detector and alarm center)
- Automatic video analysis when activated
- Remote video surveillance of the living area
- Voice alarms or SMS messages for burglaries, fire risks etc.
- SMS sending when arming / disarming the system (option)
- Configuration of 6 phone numbers
- Audio analysis of triggering reasons and opposing function

CONTROL

- Local control from a distance: Heating, lighting, roller shutters, home automation and scenarios
- Control and status display of the alarm center
- Detailed consumption display (Electricity, gas, water, etc.)
- Status display on most control units (room temperature, lighting etc.)
- Personal design of the library, symbols and interior photos
- Manage up to 10 locations (Apartments, second homes, shops etc.)

THE TECHNOTHERM ENERGY MANAGER

ELECTRICAL HEAT ACCUMULATORS CAN BE USED WITH PHOTOVOLTAIC SYSTEMS. SMART CONTROL OF ENERGY DISTRIBUTION

The TT Energy Manager is an electrical control unit that measures the existing solar power and controls the energy distribution. You can supply your home both with self-generated and heating energy in a smart way according to your individual need.

- Heating with **self-generated energy** - paired with **green electricity**, too
- **Store the heat economically!**
You can use electricity and energy 24 hours a day
- Heating units can be **individually controlled**
- Your additional **energy consumers** are supplied with **energy from the roof**
- **No CO₂ emission**
- **Sustainable** efficiency
- **Flexible** and easy
- Thanks to the TT Energy Manager, **you become largely self-sustaining, safe and independent**

CAN ALSO BE INSTALLED IN EXISTING PHOTOVOLTAIC SYSTEMS DEVICES!

We integrate our **TT Energy Manager** in your already **existing system components**: whether wood, gas or oil heating.

SOLAR ENERGY FOR FREE!

The TT Energy Manager makes it possible!

Energy revolution for your home!

TAKE CONTROL OF YOUR ELECTRICITY
AND HEATING COSTS

With **TT Energy Manager**, you become, for the most part, independent from your energy supplier and heating costs. Our TT Energy Manager is a part of your future which you can use already today.

Our **electrical, energy and heat storage** units are shapely and efficient. They store your **solar energy in the form of heat** and regulate it according **to your needs**.

Many models and application possibilities can be found in our catalogue.

Talk to us!

ErP Ready - The ErP directive

WITH PRODUCTS OF TECHNOTHERM YOU ARE **ERP READY!**

In the Ecodesign Directive (the ErP Directive), the European Union requires that the environmental impact of energy-related products be minimized. To this end, requirements for an environmentally sound design of products throughout their life cycle have been defined and transposed into national law.

Instrument of environmental protection

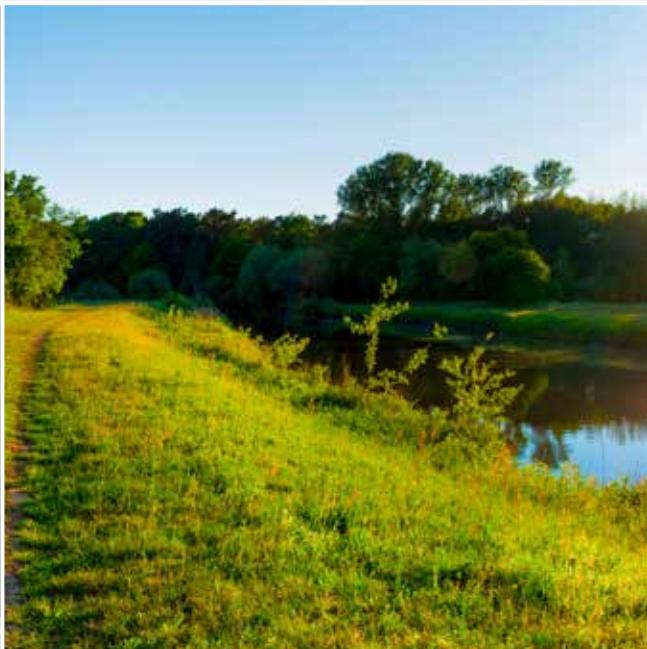

Many products which are similar in use, function and performance differ in their efficiency and environmental compatibility. The environment can be relieved in the long term by resourceconserving and energy-efficient product design.

Uniform directive for the whole EU

The provisions on the ErP Directive are applied uniformly throughout the EU. Thus, no competitive advantage can arise due to differing country-specific regulations.

Implementation at TECHNOTHERM

According to the ErP Directive, electric room heating appliances must comply with the requirements of ErP. TECHNOTHERM guarantees planners and end users an energetically high standard.

Ecodesign Directive (ErP)

ENERGY LABEL FOR HEATERS.

Graphical representation subject to change as legal changes may follow.

Objectives of the ErP Directive

With the ErP Directive, the European Union is pushing ahead with climate protection by prescribing a restriction on the energy consumption of energy related products.

Our energy-saving and future-proof electric heaters

It is our aim to provide our customers with innovative products that consume as little energy as possible with optimum performance.

We have not only responded to the new EU mandate, but we have also taken care to develop our electrical heating appliances in an energy-saving manner. The result is the "ErPReady Label" by TECHNOTHERM.

Calculation according to the ErP Directive

$$n_s = n_{s0} - 10\% + F1 + F2 + F3 - F4 - F5$$

for electric room heaters applies:

$n_{s0} = 40\%$
F1 only for electric storage heaters
F4 = 0
F5 = 0

models	$n_{s0} - 10\%$	F1	F2	F3	F4	overall result	max. score

PARTIAL STORAGE HEATING

VERSATILE & INNOVATIVE!

The TECHNOTHERM Partial Storage Heaters have been designed using the latest technology to create an elegant solution for all hard to heat situations. They can be installed in almost any location due to the flexibility of the product. The range has been developed to provide an adaptable solution for electric heating in Domestic properties, Conservatories, Holiday homes, Offices and any other central heating situation. Our unique patented Magmatic® heating tablets provide the source for the radiator.

Whilst the radiator is classed as a 100% efficient Direct Acting appliance, the heating tablets provide partial storage to prolong your heating comfort and to reduce running costs. The radiator has a robust body which incorporates a spot welded high fin surface area to ensure that there are no expansion or contraction noises during the heating cycle. The high fin design boasts 6 times the normal radiator surface area to provide a balance of Convection and Radiant heat for your added comfort.

Our partial storage heaters impress with:

- **Castors, feet stands or radiator supports can be ordered as optional extras**
- **Only 7 cm depth**
- **IP 20 / IP X4**
- **"Internet Ready" with the ECO interface
(Radio receiver RF and TPF thermostat) or the LHZ APP (DSM thermostat)**
- **Self-generated electricity can be used with the TECHNOTHERM energymanager**
- **"Low Temperature" ideal for kindergardens, schools and social facilities**

The partial storage heaters can be easily connected to a standard power outlet or an existing line. They are available with feet or castors, but can also be mounted on the wall. The range also includes space-saving partial storage heaters for winter gardens, which can be easily installed under deep windows due to their low height of only 34 cm. All our standard models come with a built-in, manually controlled room thermostat. For a completely controllable heating system, the partial storage heaters can be operated with our ECO control system (Internet-capable) or with own power (TT energy manager) and room thermostats.

Partial storage heating TT-KS

THE MODERN ELECTRIC HEATING SYSTEM

Our unique surface thermal-storage heaters are designed so that the heat is directly stored in special ceramics panels almost without energy losses. A six times larger surface ensures a correct balance of radiant and convection heat.

As soon as the surface thermal storage heater has reached its optimal temperature, the heat can be released for max. 45 minutes without current, depending on the value set on the thermostat. Depending on the programmed settings and on the substance of the building, 3-5 hours of electricity are needed on average for 24 hours heat release.

MAGMATIC® energy storage stone

Using a special technology, the heating conductors manufactured from chromium-nickel steel (scale resistant at up to 1,100 °C, better contact conditions) are filled into the storage stone. Thus the energy is almost completely converted into heat directly in the storage stone.

The wall mounting is included
in the scope of delivery;
feet or casters are available
as an option.

All RAL colors are available upon request.
Extra charge: 119,00 €

CONTROL YOUR DEVICES THROUGH INNOVATIVE NEW WIFI THERMOSTATS

Thermostat DSM

The DSM thermostat can be controlled via the DSM interface (to be ordered separately, see page 111) via the Internet using the free LHZ APP. Separate temperatures and various time programs can be set for each room (see page 6-7). Current consumption and a "history" are easy to read. The thermostat detects an open window and reacts accordingly ("Open Window" function). The "out-of-house" function allows all programmed devices to be down-regulated by a certain temperature. Automatic function - detects presence and absence and adapts to your heat demand. The DSM thermostat makes your heater, among others, ErP-ready.

Radio receiver RF

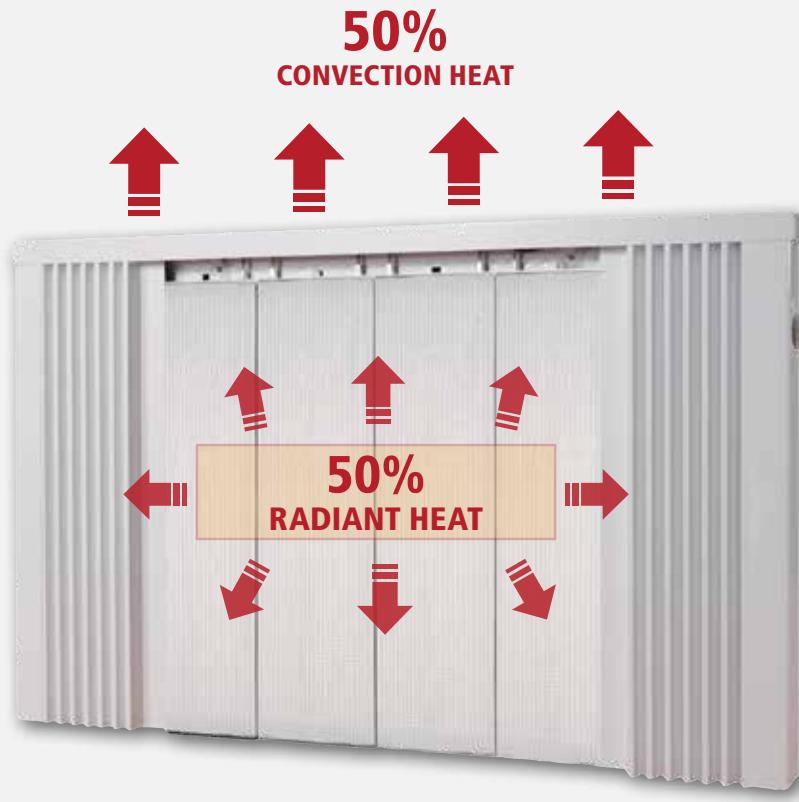

Built-in radio receiver for control with an external thermostat. TPF-ECO (exclusive) and our TYDOM APP. Necessary for control via the Internet, range within the building approx. 30 m (depending on the design), radio frequency 868 MHz (standard EN 300 200), for ECO interface (see page 8-11).

The TPF-ECO thermostat must be ordered separately (see page 111).

BENEFITS OF CONVECTION HEAT AND RADIANT HEAT IN A DEVICE

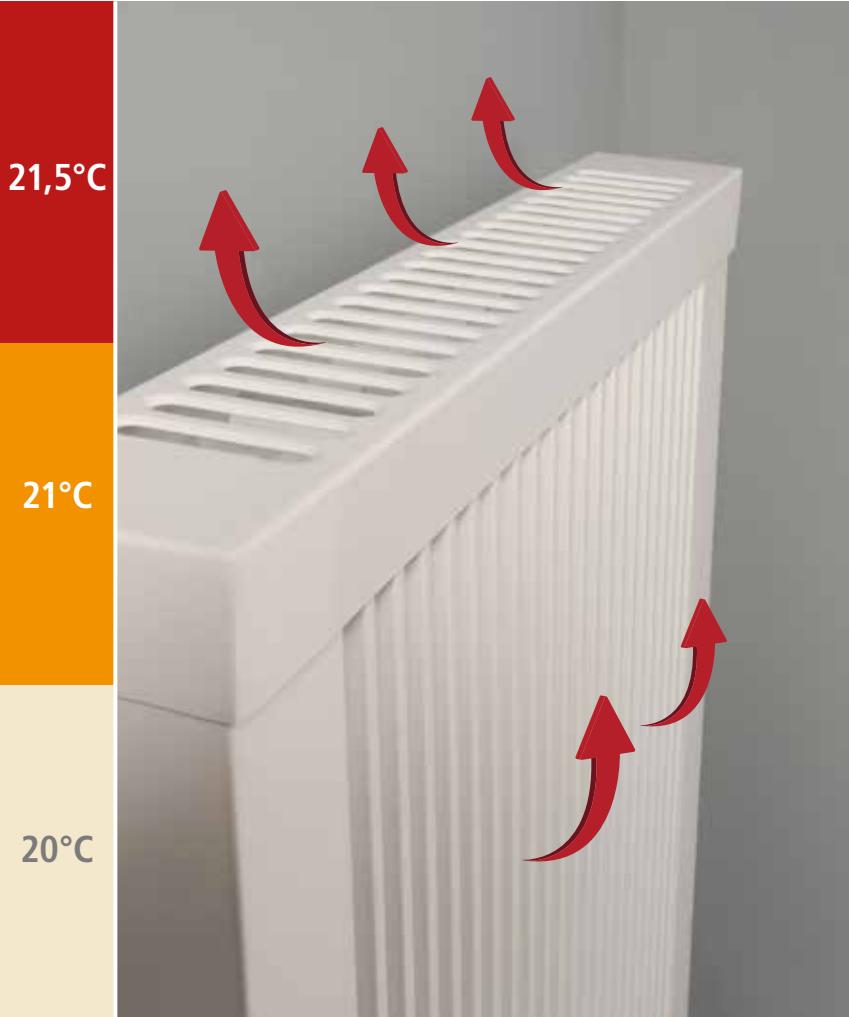

Our unique surface thermal-storage heaters are designed so that the heat is directly stored in special ceramics panels almost without energy losses. A six times larger surface ensures a correct balance of radiant and convection heat. As soon as the surface thermal-storage heater has reached its optimal temperature, the heat can be released for max. 45 minutes without current, depending on the value set on the thermostat. Depending on the programmed settings and on the substance of the building, 3-5 hours of electricity are needed on average for 24 hours heat release.

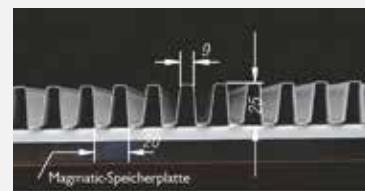

MAGMATIC®-energy storage stone

Using a special technology, the heating conductors manufactured from chromium-nickel steel (scale resistant up to 1,100 °C, better contact conditions) are filled into the storage stone. Thus the energy is almost completely converted into heat directly in the storage stone. The overheating protection is installed repeatedly in the device. The powder coating (also in its internal space) protects the device against corrosion.

▼ Sheet steel fins with 6 times more surface

▲ Special ceramic panels

◀ Development of the energy storage stone is our contribution to the reduction of your heating costs. The healing fins are welded on individually so that no crack noise occurs during heating. Thus you receive a clean and noise-free warmth.

Partial storage heating

Series TT KS-S

TT KS-S

Partial thermal-storage heater with individually weld-on fins, powdercoated surface, white RAL 9003, only 70 mm depth, infinitely variable built-in thermostat controls your room temperature, connecting lead 1.5 m with plug, 230 V~, incl. stands. **Mobile version.**

IP 20

TT KS-S DSM

As standard, in addition with DSM thermostat.

The DSM thermostat can be controlled via the DSM interface (to be ordered separately, see page 111) via the Internet using the free LHZ APP. Separate temperatures and various time programs can be set for each room (see page 6-7). With electronic room temperature control and weekday regulation. Detection of open window. Adaptive start control. Internet option (see page 111).

DIRECT ACTING PANEL HEATERS

**COMFORTABLE, QUICK
AND COST EFFICIENT HEATING!**

Technotherm offer the most up to date, energy efficient range of Electric Panel Heaters. From traditional models like the ConvctoRad CHM and CPH convector heaters, to the more modern design Panel Heaters like the VPS/VPS Design and new Ultra-Slimline ranges. There will be a product to suit all tastes, and to fit all types of heating solutions.

TECHNOTHERM offers you a tailored solution for almost each heating situation.

- **Wall Mounted Panel Heaters:** Unique Designs and highly efficient
- **Turbo Heaters:** Powerful, comfortable fast heat
- **Infra Red Heater:** accurate 'short wave' heat
- **Frost Protective Heaters:** safe and affective

PH Slimline & PH Ultraslim

ULTRASLIM WITH EXCEPTIONAL DESIGN!

► The 24/7 programmable thermostats have many features and benefits, including various temperature programs to simplify the operation of the heaters.

▲ Ultra-Slim with an exceptional design!

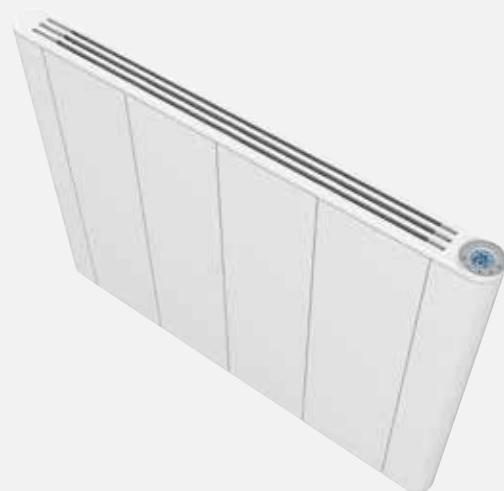

The PH Slimline and PH Ultraslim series offer a unique, flat design of only 7.5cm and 5cm.

► The modern, timeless design fulfills functionality and economy in one device.

Direct Panel Heating

Series PH Slimline & PH Ultraslim

DIRECT HEATING

PH Slimline C

- Durable epoxy powder RAL 9010
- High performance extruded aluminum heating element
- 7,5 cm width, width ensures it integrates into any décor
- Extrasilence: digital regulation with a Triac component
- Digital Programmable Control placed on the top (visibility and more accessible) with the following functions:
 - Proportional Regulating System (PID) with high performance
 - Intelligent Control System (ITCS), the radiator configures its connection times adapting to the
 - temperature of your home according to season helping an efficient energy consumption
 - Programmable from the equipment (weekly programation, 9 pre-programs and 4 customs)
 - Counter of energy consumed (last 24h, 7 days, 30 days)
 - Comfort, economic and no frost Modes
 - Easy mode function
 - Baby-care function
 - LCD screen
 - Open Window function
 - Pilot wire.
- Security Termal Control.
- 1.5m cable.

PH Ultraslim

- 100% high quality extruded aluminum design
- Ultraslim design: 5 cm width (the most thinner in the market)
- Extrasilence: digital regulation with a Triac component
- IEC Conector. Cable can be removed at the end of the season for not being visible. Compact Steel Housing box
- Durable epoxy powder RAL 9010
- Digital Programmable Control placed on the top (visibility and more accessible) with the following functions:
 - Proportional Regulating System (PID) with high performance
 - Intelligent Control System (ITCS), the radiator configures its connection times adapting to the temperature of your home according to season helping an efficient energy consumption

Wall Mounted VPS Design Panel Heater

WITH HIGH-QUALITY GLASS FRONT

▲ High-Quality Glass Front

▲ In the **VPS design** series, the name says it all. The Wall mounted panel heater has a beautifully crafted heat resistant glass front. This series is one of many new developments having our "**Made in Germany**" seal.

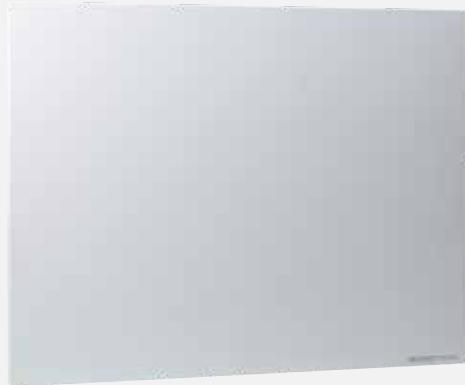

- Special ceramics thermal-storage heater for long-lasting warmth
- Effective heating unit made of aluminium
- Twin overheat safety protection
- Radio receiver RF to easily regulate the device
- Also available as a vertical version
- Glass front suitable for writing on (for bars, restaurants, etc.)
- High quality glass front in 2 different colors

An effective wall-mounted convector with a high-quality glass front combines our premium product of the VPS-Design series. Experience the appealing aesthetics combined with extraordinary heating performance.

WALL MOUNTED CHM Convecto-Rad

FAST AND COST EFFICIENT HEATING

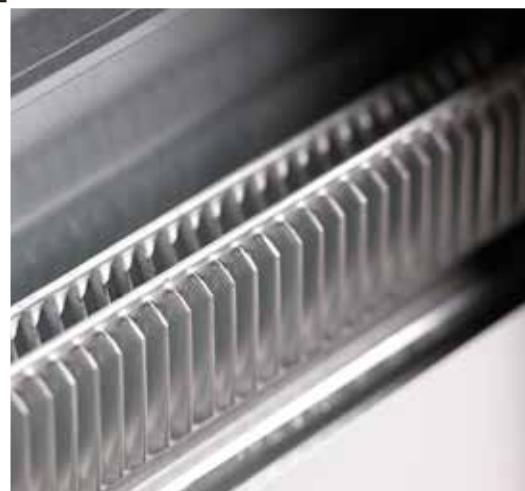

▲ With special-heat-storage stone

▲ **A unique combination of Radiant and convected heat**

Wall Mounted 'ConvectoRad' heaters with the dual advantages of Radiant and convected heat, complete with energy efficient partial heat storage. Series CHM is distinguished by the following properties:

- Quick warmth generation
- Reduced weight
- Long-maintained warmth due to the special storage stone
- Higher heat release due to special shape of the surface

RAL 9003 housing color

With the new DSM thermostat, your CHM heater is easily controllable over the Internet. Safe, clean and easy to use. No maintenance required, with 100% performance. The improved material composition and refinement of the surface results in a more uniform heat dissipation.

Direct heating

Series CHM

DIRECT HEATING

Convector CHM

Exclusive electric heater unites the properties and design of a wall convector and a surface thermalstorage heater, large surface, reduced weight, perfectly tuned heat-storage medium, high-quality heat storage stones. Incl. stands.

BATHROOM AND TOWEL RAIL HEATERS

WARMTH AND AESTHETICS COMBINED

To meet special requirements of your application, bathroom heaters from TECHNOTHERM are available in all current sizes and with different performance parameters. There are 5 types of these heaters.

Each of them has its own special advantage:

- | | |
|---|---------------|
| • Unique towel rail radiators with special heat retention | Model „HR“ |
| • high gloss finish | Model „Chrom“ |
| • Practical and pleasing 'to the eye' | Model „HR“ |
| • Elegant and luxurious | Model „Dream“ |

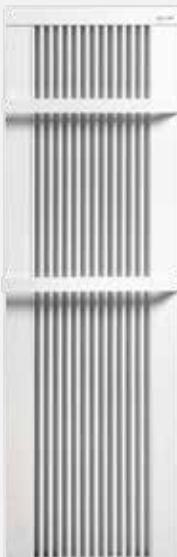

Our bathroom radiators are powerful, comfortable, safe and reliable. Radiator types of this series have not only an attractive appearance. They fulfill the requirements of the protective class IPX4 and are especially suitable for damp rooms. A warm bathroom and soft and cuddly towels – feeling good at its purest.

Create a warm bathroom and cosy towels!

Bathroom Radiator

Towel radiator series HR with heat retention tablets

Bathroom radiator HR RF

As standard, but with built-in radio receiver for control with an external thermostat e.g. TPF-ECO (exclusive) and our TYDOM APP. Necessary for control over the Internet, range within the building approx. 30 m (depending on the type of construction), radio frequency 868 MHz (EN 300 200 standard), for ECO interface (see page 8-11). **IP 24**.

The TPF-ECO thermostat must be ordered separately for all RF models (see page 111).

Bathroom radiator HR DSM

As standard, in addition with DSM thermostat. The DSM thermostat can be controlled via the DSM interface (to be ordered separately, see page 111) via the Internet using the free LHZ APP. Separate temperatures and various time programs can be set for each room (see page 6-7).

Model	Power [kW]	Dimensions W x H x D [mm]	Weight [kg approx.]	Order number	Price [Euro]

INFRARED HEATER

FUNCTIONALITY MEETS AESTHETICS!

The Infrared panel ISP is a unique heating system with exclusive design.

These infrared heaters are primarily intended for heating of interior rooms. They make a room not only warm, but also good looking since they also act as a significant element of interior design. The panels are provided with heat insulation which impedes outflow of heat into the structure behind the heating panel. They are equipped with temperature limiting thermostats and adaptable fixing brackets. Thanks to these brackets, they can be fastened both horizontally and vertically. The unique ISP infrared panel unites the functionality of a modern electrical heater (cosy warmth at low cost) and a special design.

The infrared heater from TECHNOTHERM is available in 4 different versions:

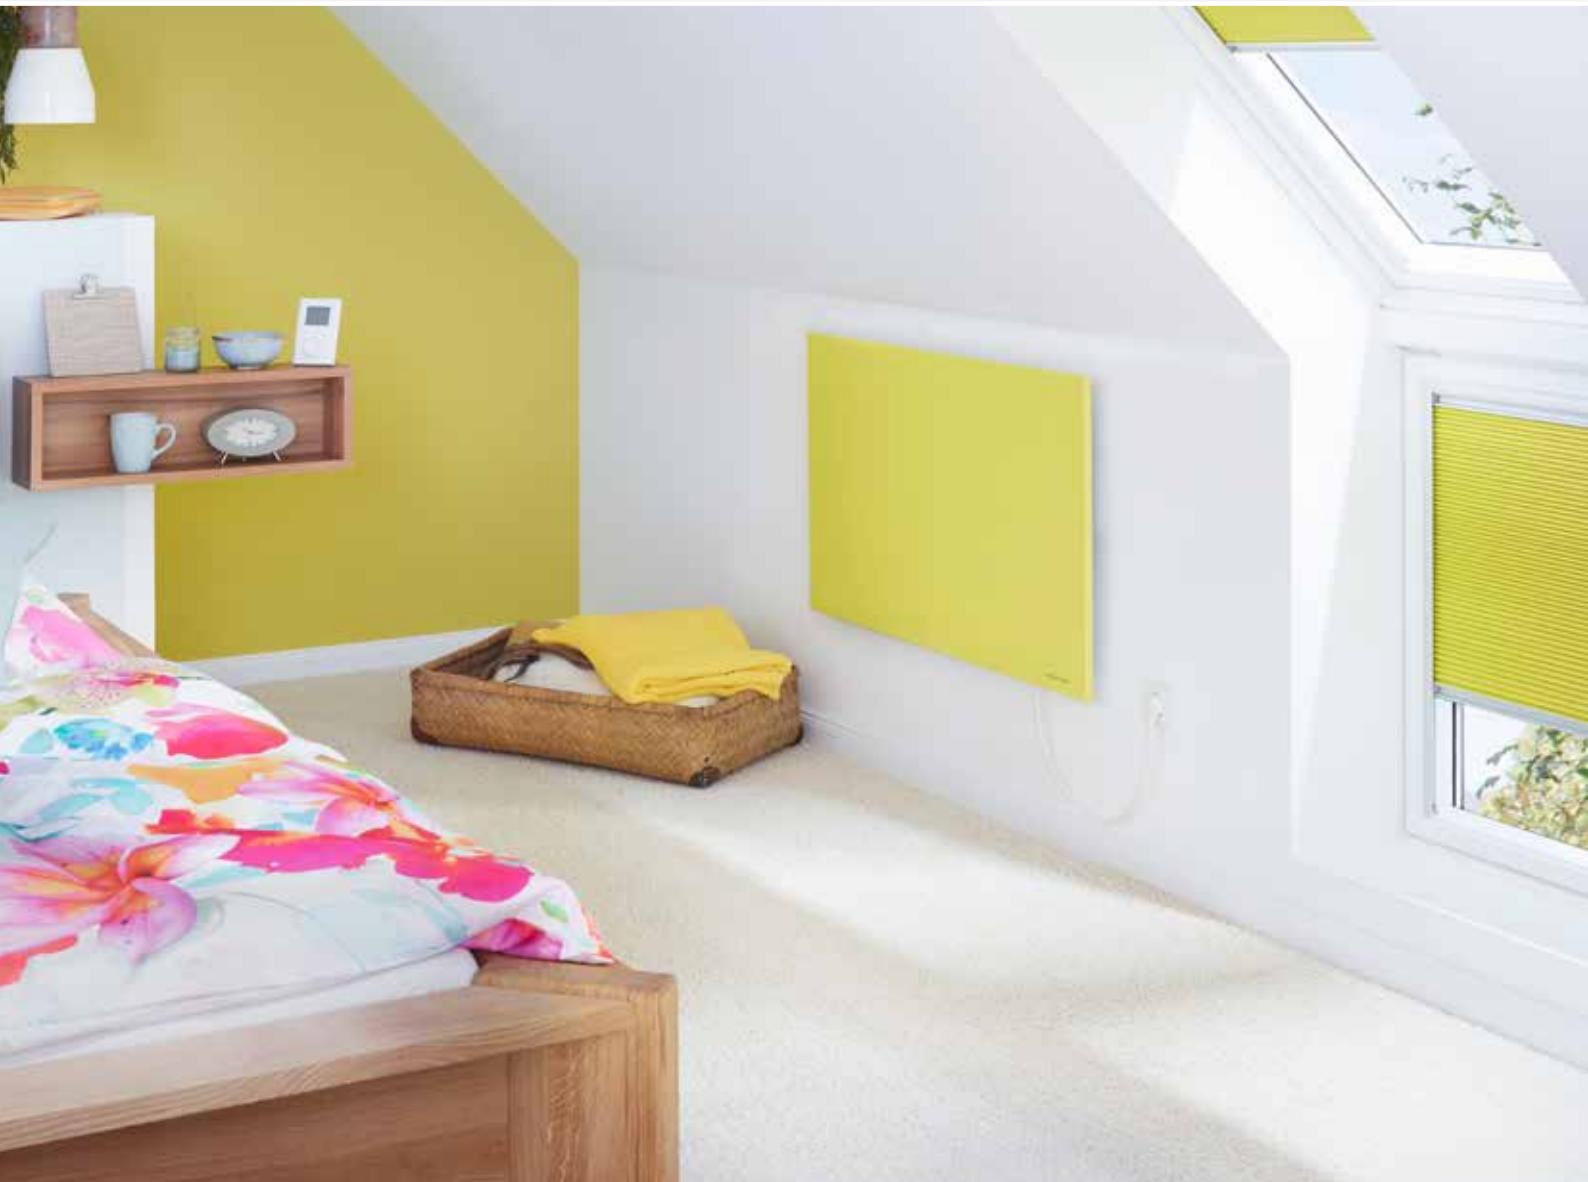

- **Exclusive glass design**
- **High quality mirror glass**
- **High-quality motif pictures**
- **Various Colours in metal finish**

Infrared heater ISP

INFRARED PANEL ISP

▲ They are equipped with temperature limiting thermostats and adaptable fixing brackets. Thanks to these brackets, they can be fastened both horizontally and vertically. This heater with an aesthetically balanced appearance emphasizes that special ambience in your rooms.

All frameless ISP are available in the following RAL colors.
Blue and yellow extra charge 80,00 €. Delivery 2-3 weeks. White in stock.

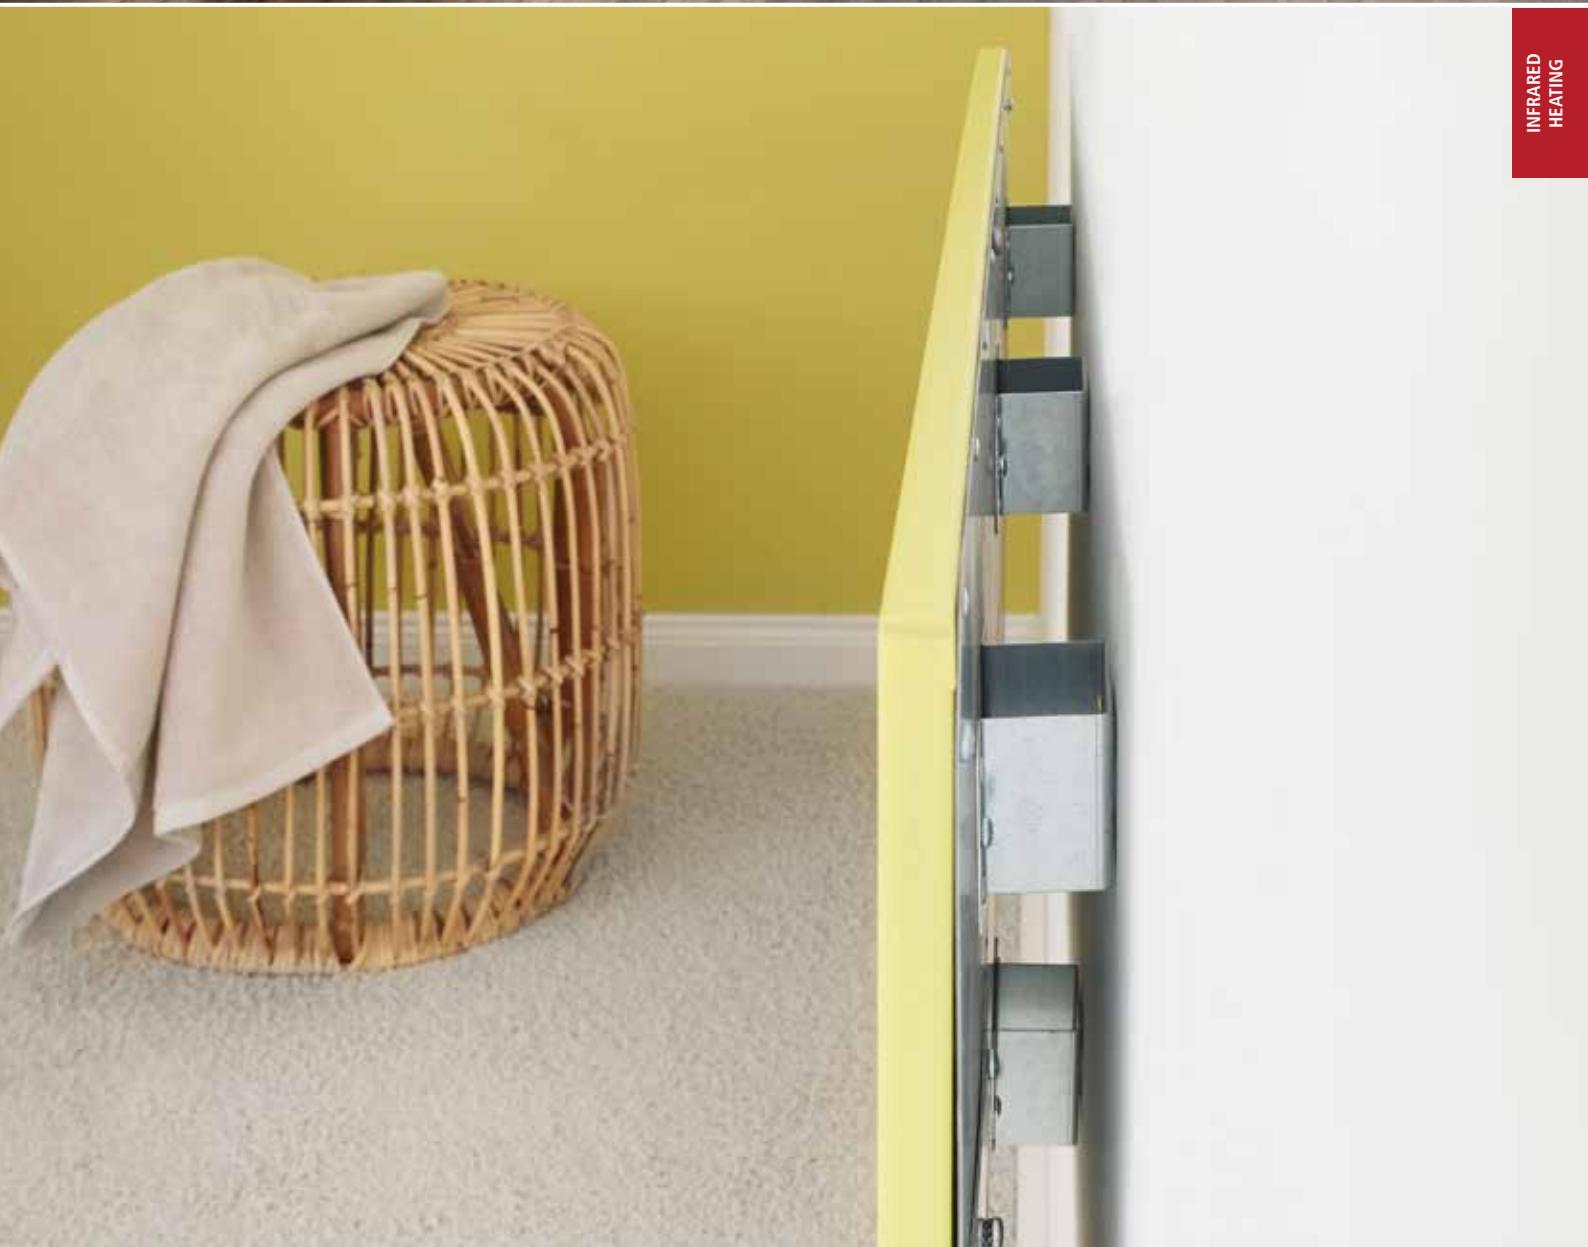

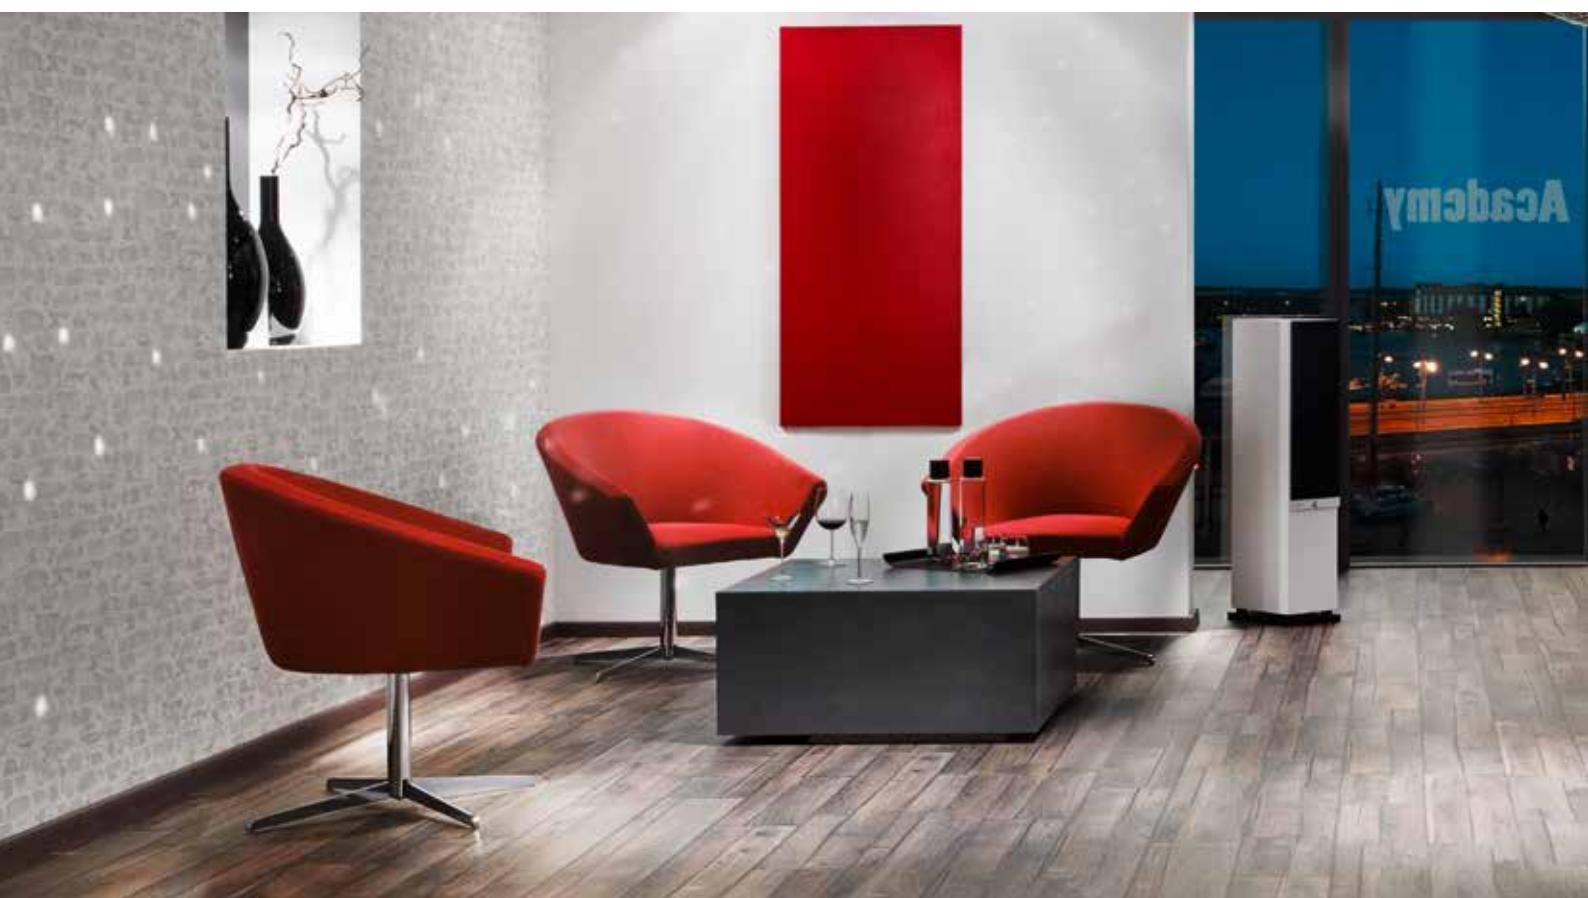

RAL 5015

RAL 1016

RAL 3003

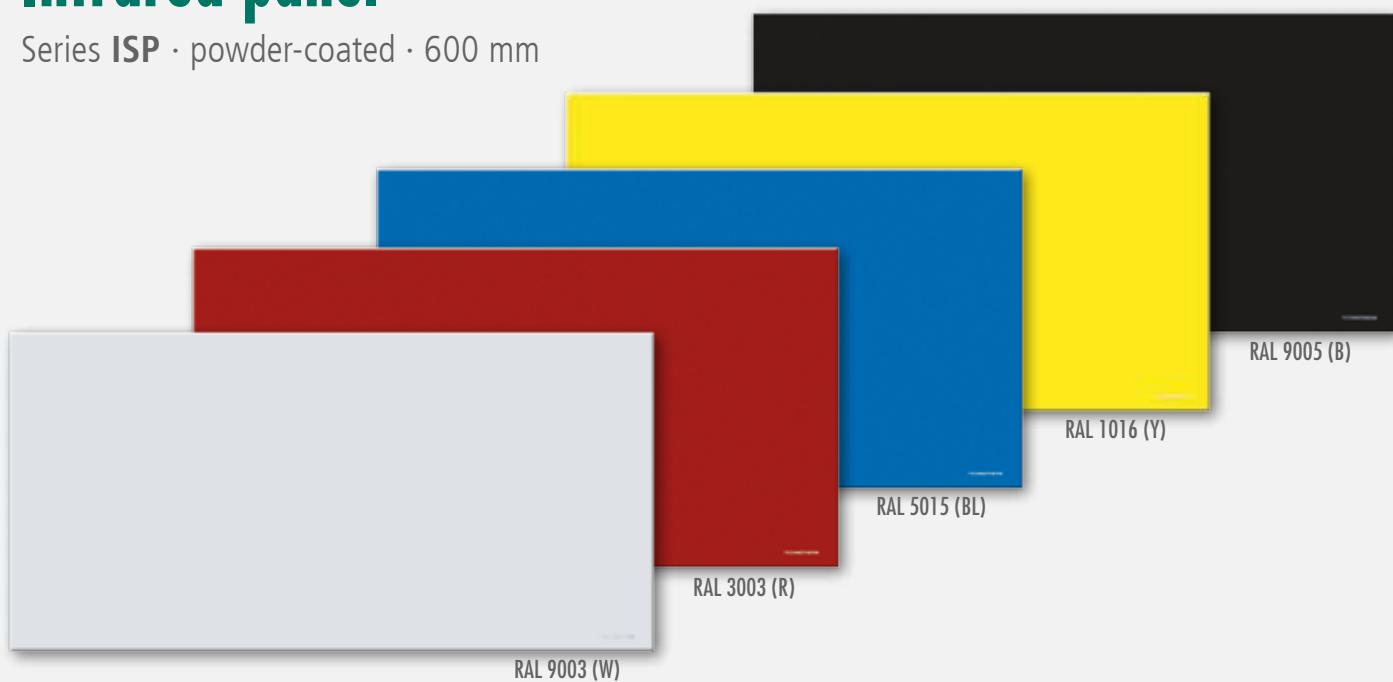

RAL 9003

Infrared panel

Series ISP · powder-coated · 400 mm

ISP (height 400 mm)

Front panel powder-coated, with plug, frameless, wall distance 33 mm.

Suitable for wall and ceiling mounting (see page 114).

ISP RF (height 400 mm)

As standard, but with built-in radio receiver for control with an external thermostat e.g. TPF-ECO (exclusive). Necessary for control over the Internet, range within the building approx. 30 m (depending on the type of construction), radio frequency 868 MHz (EN 300 200 standard), for ECO interface (see page 8-11). The TPF-ECO and TBF thermostat must be ordered separately for all RF models (see page 111). **For wall and ceiling mounting (see page 114).**

Infrared panel ISP-Design

INFRARED PANEL WITH HIGH-QUALITY GLASS FRONT

The ISP heat-radiating panel is a unique panel heater. It unites cost-efficiency and glass design in a single device. This electrical heater will become a significant design element of your home interior. To emphasize a special ambience in your rooms, the panel radiators can be mounted on walls both horizontally and vertically. The glass panels are primarily intended for heating interior rooms and are provided with a so-called "crumble effect". The latter prevents a danger of injuries if the glass panel breaks.

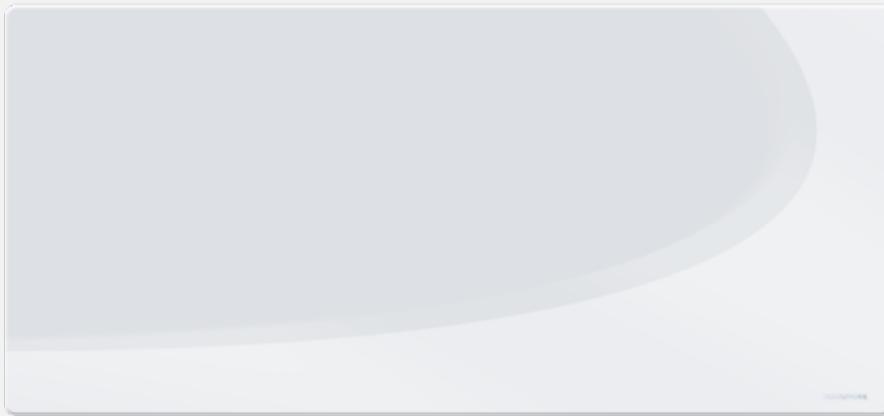

Its very slender and high-value appearance (only 20 mm) makes it an eye-catcher in your home.

Infrared panel

Series ISP Design · glass front white · 690 mm

ISP Design white (height 690 mm)

High quality, elegant front of polished white glass, with rounded edges, frameless design, with plug, wall distance 33 mm.

Only suitable for wall mounting!

ISP Design white RF (height 690 mm)

As standard, but with built-in radio receiver for control with an external thermostat e.g. TPF-ECO (exclusive) and our TYDOM APP. Necessary for control over the Internet, range within the building approx. 30 m (depending on the type of construction), radio frequency 868 MHz (EN 300 200 standard), for ECO interface (see page 8-11). The TPF-ECO and TBF thermostat must be ordered separately for all RF models (see page 111).

Only suitable for wall mounting!

Infrared panel with motifs

ISP PRINTED OR WITH INDIVIDUAL MOTIF

This infrared radiant panel with motifs is a real eye-catcher. These heating panels are primarily intended for heating of interior rooms. They make a room not only warm, but also good looking since they also act as a significant element of interior design. There are four different motifs available in these infrared heating panels. You can also implement your own motif for an extra charge.

So you can design your interior individually according to your own taste. Design and warmth - a good match!

UNDER-FLOOR HEATING

THE BEST HEATING COME FROM BELOW!

...by that, we mean healthy warmth smoothly released from large surfaces, e.g. floors. Cable heating systems from TECHNOTHERM make your dream of floor heating true, realistic and affordable. Whether direct heating in new buildings or comfortable floor temperature control, e.g. in renovated old buildings. All our cable heating systems have the following advantages in common: more cosiness and living comfort, less energy consumption. The healthy radiant heat allow you to reduce your room temperature settings by 3 °C, but your room will remain as cosy and comfy as before. Surely, it is a good investment.

Available floor heaters from TECHNOTHERM are the following:

- **Standard heating mat**
- **Set of heating mats with various thermostats**

TECHNOTHERM offers you cable heating systems for floor temperature control and direct floor heating. The heating pads are extremely thin and ideally suitable for old buildings. They can also be installed after completion of your renovation project. You can choose almost whichever floor covering material you like. Not only carpets, PVC or cork, but also tiles, parquet or marble.

UNDER-FLOOR
HEATING

Heating mat Warm Floor WFK

COMFORTABLE HEAT COMES FROM BELOW

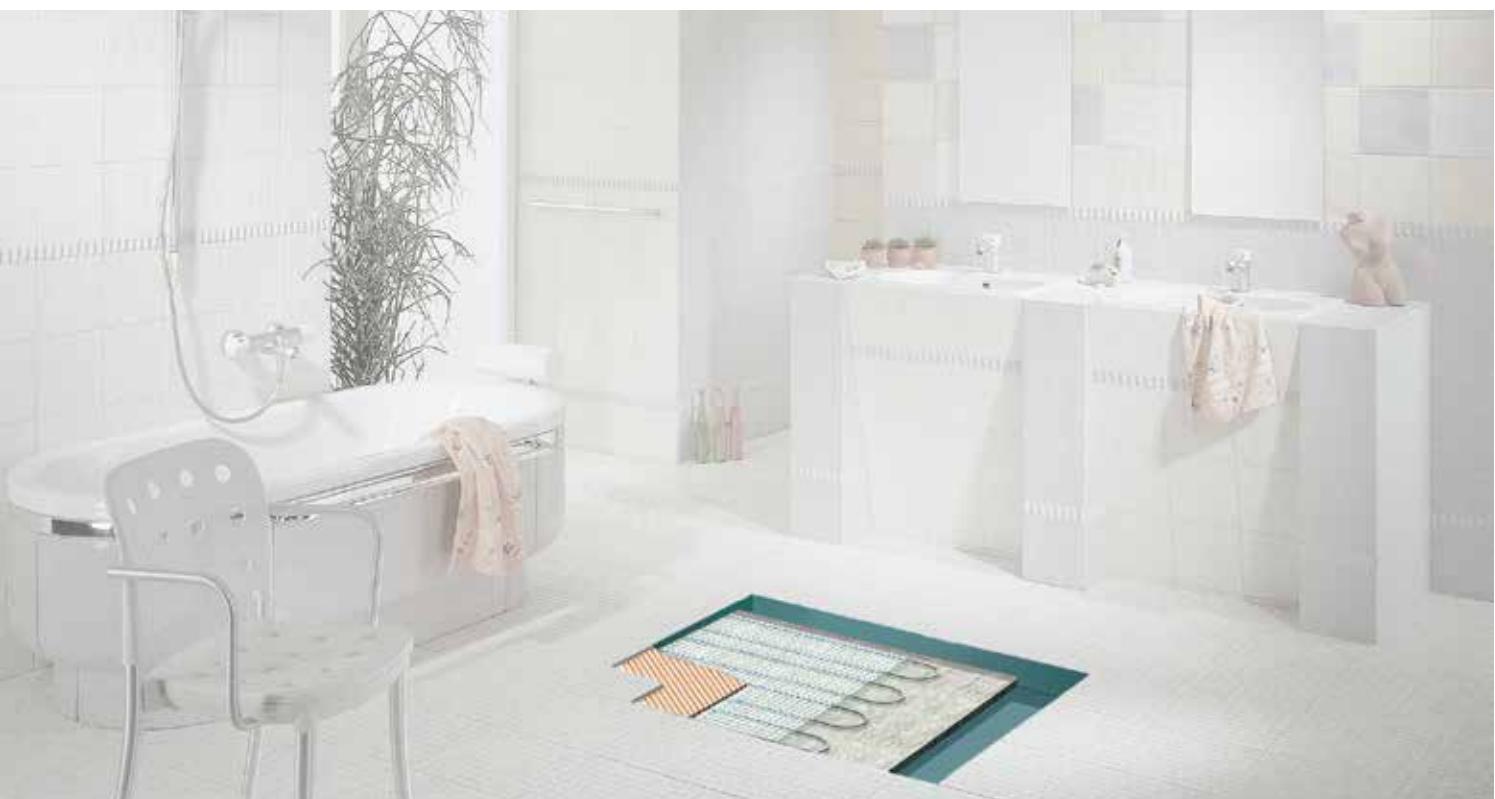

They cannot be seen but you can feel the warmth!

The incomparable thermal comfort of the cable heating systems from TECHNOTHERM.

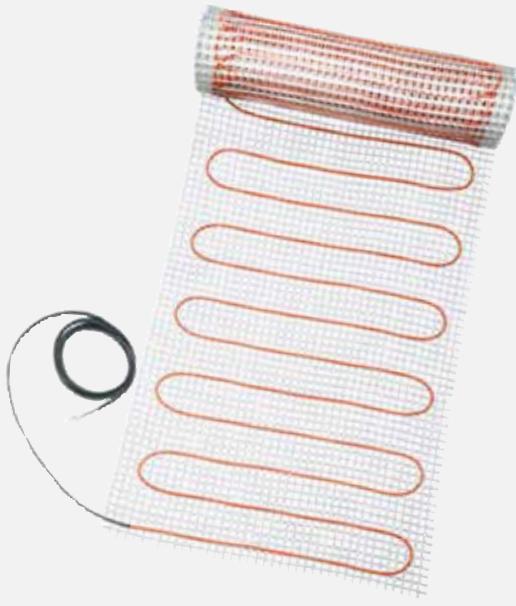

Comfortable warmth without radiators - with an ideal temperature profile:

The feet are comfortably warm, the head remains pleasantly cool.

Under-floor heating

heating mat Warm-Floor WFK

Heating mat WFK 160 W/m²

The floor heating for quick heating and continuous warm keeping of your floor. For the heating and additional heating of old and new buildings. Suitable for carpet, ceramic tiles and parquet floor. Feed in from one side with only one cold wire, simplified installation, easy adaption to the room conditions, saves time and effort. Specific power 160 W/m² Multifilar hot wire, teflon-isolation, coppergrounding conductor, Heating cable sewed on self-adhesive fabric, mat thickness approx. 3 mm, 1 cold wire 4 m length, VDE 0700-96, DIN EN 60335-2-96.

Under-floor heating

Heating mat Warm-Floor WFK-Set

Heating mat-set WFK 160 W/m²

Complete set for floor temperature control consisting of:

- Heating mat WFK-160 W/sq.m with 1 x 4 m PTC resistor
- floor thermo-regulator TRT 61-50 with remote sensor
- 1 m flexible protective tube
- sensor sleeve FH
- with adaptive start control

The TRT 61-50 is a time-controlled universal temperature controller. It allows one or two warm periods a day, eg. from 6am to 10pm for a living room or 6am to 9am and 5pm to 9pm for a bathroom. In between are the economy times. The economy temperature, the controller reduces the set room temperature, will be programmed once.

Room temperature controller - The unit regulates the room temperature in the range 5 ° - 30 ° C to the desired set temperature. Displayed is numerically the actual room temperature.

Floor temperature controller - The unit controls the floor temperature in the range 10 ° - 40 ° C to the desired set temperature. The actual room temperature will be shown numerically.

Room temperature controller with monitoring function - The unit regulates the room temperature in the range 5 ° - 30 ° C to the desired set temperature. The actual room temperature is shown numerically. In addition, the floor temperature is monitored. The maximum floor temperature will be programmed once.

NATURAL STONE HEATING

**HEALTHY HEAT
IN AN ELEGANT FORM!**

Natural stone heaters from TECHNOTHERM is a showcase example of our numerous product innovations. Living comfort and elegance are united in a unique way. This exceptional heater is a real eye-catcher, which clearly up-values your home! Its robust design comes from natural stones, which are surely the noblest interior material.

Our natural stone heaters feature the following advantages:

- **Wide choice of types and sizes**
- **Can be mounted on walls vertically and horizontally**
- **IP 66**

Thus they harmonically fit into each ambience - whether they are made of noble marble, or with polished granite or as local Jura of yellow limestone. Moreover, the TECHNOTHERM natural stone heating radiates health radiant warmth, which directly heats people and objects in the room without heat convection.

It is not only the most comfortable heating method, but also the most healthy one since it does not require air circulation. So you can significantly reduce dust, bacteria and pollen in the air. Allergic and sensitive persons can take a deep breath.

Naturat-stone heater TTM-S

THE ALTERNATIVE FOR A HEALTHY
AND MAINTENANCE-FREE FUTURE

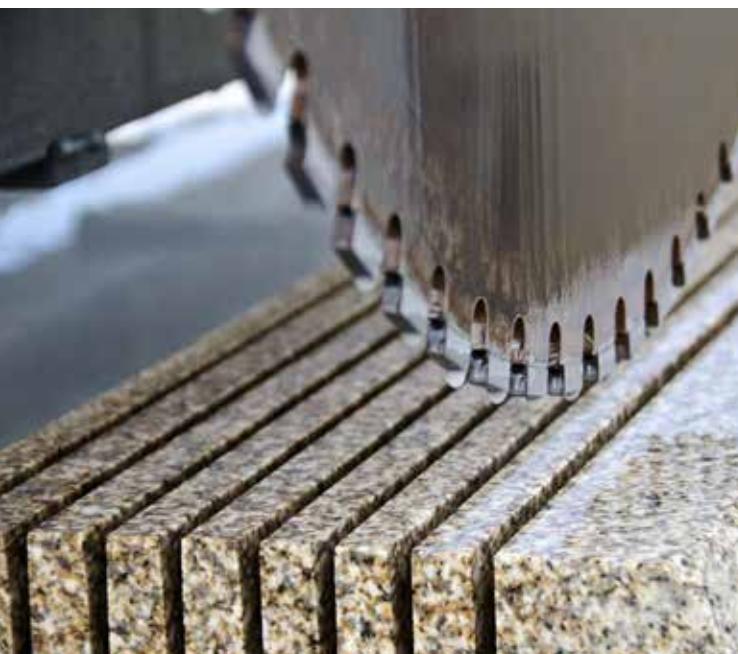

TECHNOTHERM Natural stone heating systems are a safe and maintenance-free alternative for your future. Lower purchasing costs, no storage of fuels, as well as no maintenance costs are clear arguments.

No matter whether new construction, conversion or modernization, the natural stone heating is more economical than conventional heating systems. There is hardly no transmission loss, the heat is generated where it is needed: in the living rooms. Especially in the spring or autumn the natural stone heating in the bathroom is an excellent source of heat when the central heating system does not provide the desired comfortable heat.

Please also note our new TRF-N supplementary module for controlling your natural stone heating (see page 115).

From the blocks of natural stone, the individual "in-determinates" are sawn. The natural stone heating gets its first rough form here.

◀ Our TECHNOTHERM natural stone heaters are made of natural stone blocks from different countries. The heavy blocks are cut into a handy size at so-called "gaunt saws".

◀ The high-temperature resistant heating conductors are laid in the grooves milled on the backside and glued with a special temperature-resistant shamotting mortar. This results in durability and has nearly 100% heat transfer.

The precious raw material of our natural stone heating systems comes from:

- Germany (Jura)
- Greece
- India
- Iran
- Italy

Natural-stone heater

Series TTM-S Varios and Galaxis

Natural-stone heater Varios / Galaxis

Premium class natural stone, invisible wall mounting (horizontal or vertical), heating element invisible embedded in the stone back face, protection class I, mild radiation warmth through the crystalline structure of the natural stone.

IP 66

Use only with TRF-N (see page 115) external control and our Eco interface (see page 111).

Natural-stone heater

Series TTM-S Thassos and Labrador

Natural-stone heater Thassos / Labrador

Premium class natural stone, invisible wall mounting (horizontal or vertical), heating element invisible embedded in the stone back face, protection class I, mild radiation warmth through the crystalline structure of the natural stone.

IP 66

Use only with TRF-N (see page 115) external control and our Eco interface (see page 111).

ELECTRICAL DYNAMIC STORAGE HEATING

**WARMTH TO FEEL
GOOD EVERYWHERE!**

This is modern heating technology for each home: efficient electrical heating devices from TECHNOTHERM supply comfort and warmth extremely economically for your home. Moreover -with low-tariff energy at a favourable price offered by many energy suppliers at night and even all the day on weekends. Our electrical thermal storage heaters are distinguished by:

- **Timelessly modern design**
- **Efficiency**
- **Optimal dimensions and power, perfect for each room size**
- **Option of control via Internet (with ECO control)**
- **Option of using self-generated energy (with Energy Manager)**
- **As Slim as 13 cm, depending on the model**

The heating control with a number of high-efficiency thermostats and temperature controllers is easily adapted to your demands. Its programmed control ensures a homely and cosy ambience. The thermal-storage heaters from TECHNOTHERM unite cost-efficiency and modern heating comfort in your own home.

ELECTRICAL DYNAMIC STORAGE HEATERS

Individual and versatile combinations

The "dynamical series" design is timeless and adaptable at the same time. Fronts without joints are easy to clean. Chamfered corners and edges add more safety at home. A trendy colour (RAL 9002) ensures that the TECHNOTHERM electrical thermal storage heaters fit smoothly with each interior style.

Due to the extensive range and slim-line depth (from 13 cm), it is possible to choose a model for each area of the home. All electrical thermal storage heaters are equipped with innovative accessories and can be mounted on walls. To allow free combinations of different types of devices, all devices in all product ranges have the same design.

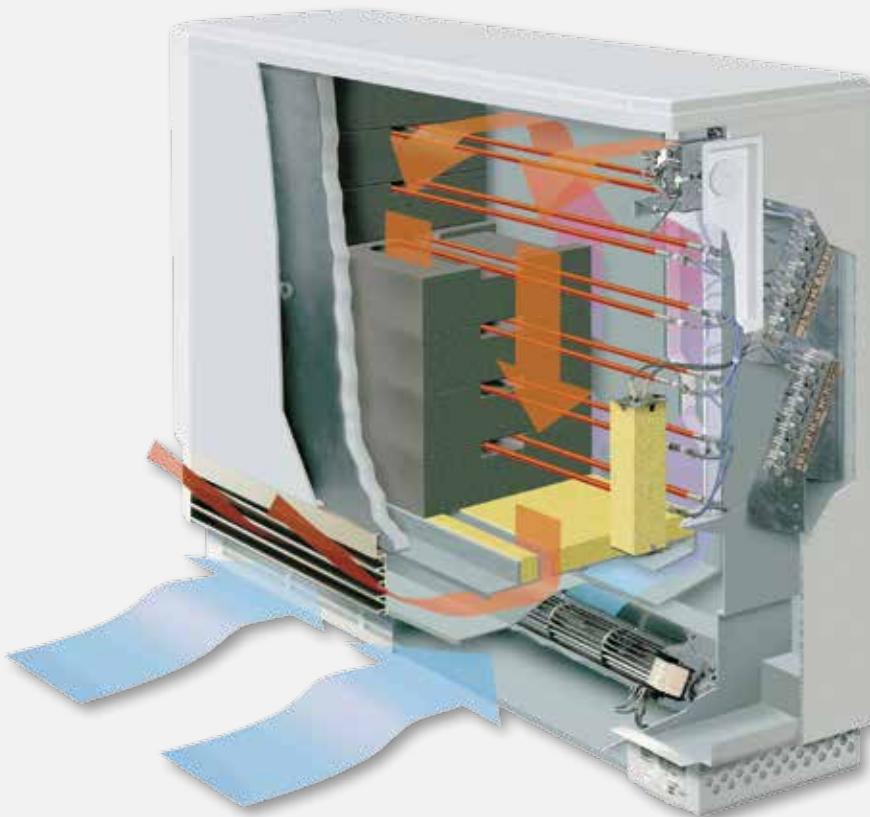

What are the components of a heat storage system?

A modern and efficient heat storage system consists of:

- Heat storage
- High heat storage retention
- Central control unit with weather sensor

The required accessories can be found on pages 116-117

► Modern electrical thermal storage heaters are "slim" and compact. Their function and performance fit with any kind of room. Especially from this point of view, series TTS-F and TTW invigorate innovations in heating systems.

Our electrical thermal storage heating systems run at low fan speeds. Thus we achieve a uniform distribution of heat in the room at the lowest noise emission. Air suction from the front via the integrated dust filter significantly improves the room air quality and thus contributes to your comfort and good feeling.

Electrical thermal storage heater

Series TTS

Series TTS with electronic charging regulator

sheet steel housing, colour RAL 9002, to be mounted on floors or on walls, power reduction is possible by changing connections, only 24.5 cm depth, with an electronic charging (AC/DC) 230 V, 0-80% ED DC 0,91-1,43 V. **Only use with external control e.g. TPF-Eco (see page 111) and the central control unit RS200 (see page 116).**

IP 21

Series TTS with electronic charging regulator and ECO-receiver

Can be regulated via Internet! Similar to type TTS, however, with additionally built-in components: TRF (radio receiver) and IRT (thermal regulator). A radio transmitter TPF-Eco (not included) is additionally required (AC/DC) 230 V, 0-80% ED DC 0,91-1,43 V. **Only use with external control e.g. TPF-Eco (see page 111) and the central control unit RS200 (see page 116).**

HOT WATER HEATING

ECONOMIC AND WITH
COMPLETE COMFORT!

Today cosy warm water is a matter of course in everyday life – also thanks to modern water heaters from TECHNOTHERM. Besides their incomparable comfort, these heaters also help to keep the costs of water heating as low as possible.

Our water heating devices feature the following clear advantages:

- Decentralized energy supply, directly on the spot of consumption
- Cost-efficient operating
- Very easy to use
- Stylish designs

They fit harmoniously into every ambience and adjust themselves in their performance perfectly to the respective requirements. Hot water equipment from TECHNOTHERM.

HOT WATER HEATING

SMALL, COMPACT AND COST-EFFECTIVE

▲ Find the best compromise between energy-saving, low-calcification operation of the comfort water heater and the requirements for high water temperatures in the household.

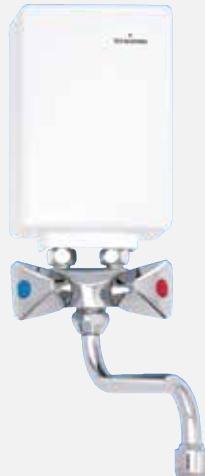

The energy-saving instantaneous water heaters from TECHNOTHERM offer an ideal and economical solution for bathrooms and kitchens. Small and compact, they fit under any sink or niche.

◀ The fully electronic CDE-L 11-15 LCD Select or CDE-L 18-24 LCD Select allow water heating at one-degree accuracy and make showering to a real pleasure. Setting the desired water temperature is childishly simple by "+" or "-" buttons and can be read on a large indicator screen. Thanks to smart controllability, you can save up to 30 percent operating costs compared to hydraulic flow-type heaters. A LCD display shows the current water temperature. In the diagnostic mode, you can read the current capacity, flow rate, output temperature and bubble detection whilst the device is running.

Thermostat

①

②

③

Thermostat DSM¹

The DSM thermostat can be controlled with the DSM interface (to be ordered separately, see page 111) via the Internet using the free LHZ APP.

Separate temperatures and various time programs can be set for each room (see page 6-7). Current consumption and a "history" are easy to read. The thermostat detects an open window and reacts accordingly ("Open Window" function). By the "outside-house" function all programmed devices are down-regulated by a certain temperature. Automatic function - detects presence and absence and adapts to your heat demand. The DSM thermostat makes your heater ErP-ready.

Thermostat E²

Manual thermostat for temperature control, easy operation, setting range in 7 steps from 0 ° C to 30 ° C, temperature sensor integrated in the side part, frost protection mode adjustable. IP 24

Radio receiver RF³

Built-in radio receiver for control with an external thermostat e.g. TPF-ECO (exclusive) and our TYDOM APP. Necessary for control over the Internet, range within the building approx. 30m (depending on the type of construction), radio frequency 868 MHz (EN 300 200 standard), for ECO interface (see page 8-11). **The TPF-ECO and TBF thermostat must be ordered separately for all RF models (see page 111).**

Accessories

Direct heater

TPF-ECO radio thermostat¹

New controls, electronic Rotary switch, backlight: 3 colors, depending on setpoint Indicator of consumption, automatic Conversion summer/winter time, Keylock, radio protocol: bidirectional on the Eco-receiver tuned, compatible with the App Control, battery life: 5 to 10 years, **IP 30**

DSM Interface³

The DSM interface is required for the Internet control of all radiators with the DSM thermostat. The "plug & play" mode helps you install the heaters and the interface easily.

ECO-Interface 1.0 + 2.0²

You need this Eco interface to access your heating equipment from your terminal devices (smartphone or tablet) via Internet. The installation is automated and does not require previous knowledge. Installation Assistant will navigate you through the programme menus.

1 set consists of:

- 1 radio interface X3D + 1 cable RJ45
- to connect to the ADSL router
- Radio frequency: 868 MHz
- Radio range: up to 300 m in a free field
- 14 languages integrated
- Compatible with operating systems
Android from 2.3.3 and iOS5
- Voltage supply 230 V~

For a detailed description, see page 8-11

Thermal storage heaters

Central control with RS 200¹ integrated clock work

Fully digitized central control with integrated clock and outside temperature dependent output contactor. It allows the regulation of electronic and thermomechanical charge controllers from storage heaters. The control signal is a clocked AC-voltage according to DIN 44574.

Possible functions: backward-, spread-, or forward control. Setting range: 37 to 80 % ED. Max. control power: 270 W Signal Suppression day (SUT) incl. weather sensor

Group control GS 200²

For signal amplifying and adaption to the individual heating needs. By means of the setting E5, the source signal of the group control device is influenced and leads to higher or lower charge degree at the connected storage heaters (group- or domicilewise) Setting range: -30 to +10 % Max. control power: 160 W

Series TRT³⁺⁴ electromechanical

Basic version pure white, ambient temperature regulator with thermal return, wall surface mounting or directly on embedded connection box, range narrowing (heating cost brake) in the adjusting button, 5 °C to 30 °C, 1 opener, 230 V~, temperature reduction via external control.

IP 30

Thermal storage heaters

Integrated ambient temperature regulator¹

For storage heater series:
TTS, TTN, TTS-F, TTN-F, TTH, TTW
Integrated ambient temperature regulator consisting of:

- Capillary pipe regulator
- Switch for auxiliary heater
- Switch for additional heating element, ready with plug and wired on interchangeable hutch 5 °C to 30 °C, 16 A / 230 V~

Built-in room temperature regulator Electronic version²

With built-in radio receiver RF ECO for control with an external thermostat (exclusive). Necessary to control via the Internet. Range in the building approx. 30 m (depending on construction). Radio frequency 868 MHz (standard EN 300 200)

Electronic Charge Controller Kit TTE 02³

The electronic charge controller kit TTE 02 offers a very accurate manual charge in correlation of weather and remaining heat. Appropriate for following control signals: AC: 37/40% ED, 68/72% ED, 80% ED PS, 80%ED NS, DC: 0,91- 1,43 V~ PS, 0,91-1,43 V~ NS, consists of: mounting guide,- board, potentiometer, thermal relay, sensor, wiring-set and bracket

Taste patterns and usage patterns

Usage patterns:

Our newly developed partial storage heater with a maximum surface temperature of 60 ° C is unique in its kind. Our idea of this heating type, e.g. social facilities and kindergartens, we have been protected.

In our range of infrared heating systems, we have further usage patterns. The unique heat transfer from the heating conductor distinguishes these devices and stands for our high quality requirements.

Our used heat storage stones are high quality and exclusive. They store the heat extremely effectively. We have incorporated our entire know-how and patented our ideas.

Design:

Our product series "Wall convector VPS" is not only beautiful, but also inexpensive in operation. A taste pattern was it worth!

Declaration of conformity

With the CE marking, the manufacturer or EU authorized representative in accordance with EU regulation 765/2008, declares "that the product complies with the applicable requirements laid down in the harmonization provisions of the Community concerning its installation" is therefore not a quality seal, but an identification mark which is to be produced by the manufacturer in his own discretion and by means of which he expresses the fact that he is aware of the particular requirements of the product which he distributes and that this corresponds to this.

The VDE test mark stands for safety. The consumer can rely on this. After successful inspection of production sites, product inspections and regular production monitoring, the VDE Institute assigns various certification marks. It confirms compliance with the protection requirements of the applicable directives. The VDE symbol stands for the safety of the product with regard to electrical, mechanical, thermal, toxic, radiological and other hazards.

Each electrical or electronic device transmits and receives electromagnetic waves. These interference emissions can affect the devices on the other hand. The test certificate for electromagnetic compatibility (EMC) of products indicates that the requirements of the EU directive on electromagnetic compatibility are complied with.

The sealed safety seal (GS-Mark) certifies that a ready-to-use product meets the requirements of § 21 of the Product Safety Act (ProdSG). These requirements are defined in terms of "quantity and quantity", especially in DIN standards and European standards or other generally accepted rules of technology. The certification, introduced in 1977, is intended to protect the user and third parties from damage to life and limb in the intended and foreseeable use (in the non-harmonized area, i.e. without a European standard) and by observing the European guidelines (in the harmonized area) is still the only legally regulated test mark in Europe for product safety. The CE marking is required for certain products, but it is a declaration by the manufacturer or distributor that it complies with all European requirements (directives and / or regulations).

The Ecodesign Directive 2009/125 / EC establishes a framework for setting requirements for the environmentally design of energy-related products (ErP). The European ErP Directive 2009/125 / EC, also known as the Eco-Design Directive, defines minimum requirements for energy-related products. The aim of the ErP guideline is to reduce energy consumption and CO₂ emissions as well as to increase the overall share of renewable energies. This Directive applies to all products placed on the market in the European Economic Area (EEA).

Many applications, electrical and electronic equipment must operate reliably for many years under difficult environmental conditions. In addition to the permissible temperature range, the corrosive load, which is understood to mean resistance to aggressive media such as moisture, water, vapors, acids, alkalis, oil or fuels, Technotherm takes care of your safety with the high, respected production standard.

Verkaufs- und Lieferbedingungen LUCHT LHZ Elektroheizung GmbH & Co. KG

Bei allen Geschäften mit Wiederverkäufern oder gewerblichen Abnehmern gelten ausschließlich diese Bedingungen

I. Allgemeine Bestimmungen

- Für den Umfang der Lieferungen oder Leistungen (im Folgenden: Lieferungen) sind die beiderseitigen schriftlichen Erklärungen maßgebend. Allgemeine Geschäftsbedingungen des Bestellers gelten jedoch nur insoweit, als der Lieferer oder Leistende (im Folgenden: Lieferer) ihnen ausdrücklich schriftlich zugestimmt hat.
- An Kostenvoranschlägen, Zeichnungen und anderen Unterlagen (im Folgenden: Unterlagen) behält sich der Lieferer seine eigentums- und urheberrechtlichen Verwertungsrechte uneingeschränkt vor. Die Unterlagen dürfen nur nach vorheriger Zustimmung des Lieferers Dritten zugänglich gemacht werden und sind, wenn der Auftrag dem Lieferer nicht erteilt wird, diesem auf Verlangen unverzüglich zurückzugeben. Die Sätze 1 und 2 gelten entsprechend für Unterlagen des Bestellers; diese dürfen jedoch solchen Dritten zugänglich gemacht werden, denen der Lieferer zulässigerweise Lieferungen übertragen hat.
- Ein Standardsoftware hat der Besteller das nicht ausschließliche Recht zur Nutzung mit den vereinbarten Leistungsmerkmalen in unveränderter Form auf den vereinbarten Geräten. Der Besteller darf ohne ausdrückliche Vereinbarung eine Sicherungskopie erstellen.
- Teillieferungen sind zulässig, soweit sie dem Besteller zumutbar sind.
- Der Lieferant ist berechtigt, seine Forderungen aus Lieferungen und Leistungen zu Finanzierungszwecken abzutreten.

II. Preise und Zahlungsbedingungen

- Die Preise verstehen sich ab Werk ausschließlich Verpackung zuzüglich der jeweils geltenden gesetzlichen Umsatzsteuer.
- Hat der Lieferer die Aufstellung oder Montage übernommen und ist nicht etwas anderes vereinbart, so trägt der Besteller neben der vereinbarten Vergütung alle erforderlichen Nebenkosten wie Reisekosten, Kosten für den Transport des Handwerkzeugs und des persönlichen Gepäcks sowie Auslösungen.
- Zahlungen sind frei Zahlstelle des Lieferers zu leisten. Zahlungs- und Skontofristen laufen ab Rechnungsdatum. Für die Einhaltung der Frist ist der Tag des Zahlungseingangs maßgebend.
- Der Besteller kann nur mit solchen Forderungen aufrechnen, die unbestritten oder rechtskräftig festgestellt sind.
- Kommt der Besteller mit einer Zahlung in Verzug, so werden alle anderen Forderungen sofort zur Zahlung fällig, ohne dass es einer gesonderten Inverzugsetzung bedarf.
- Für Lieferungen und Leistungen an Besteller im Ausland gilt als ausdrücklich vereinbart, dass alle Kosten der Rechtsverfolgung durch den Lieferanten im Falle des Zahlungsverzuges des Bestellers, sowohl gerichtliche als auch außergerichtliche, zu Lasten des Bestellers gehen.
- Gerät der Besteller mit der Zahlung in Verzug sind wir für diesen Fall berechtigt, Verzugszinsen in Höhe von 5 % über dem jeweiligen Basiszinssatz der Europäischen Zentralbank (EZB) zu verlangen. Bei Kaufverträgen zwischen Unternehmen werden Verzugszinsen i.H.v. 8 % über dem jeweiligen Basiszinssatz der EZB fällig.

III. Eigentumsvorbehalt

- Die Lieferungen bleiben das Eigentum des Lieferers bis zur Begleichung von sämtlichen Forderungen, die dem Lieferer gegen den Käufer zustehen, gleich aus welchem Rechtsgrund sie entstanden sind. Bei laufender Rechnung gilt das vorbehaltene Eigentum als Sicherung für die Saldoforderung des Lieferers.
- Der Käufer ist zum Gebrauch und zur Weiterveräußerung von Vorbehaltsware im ordnungsgemäßen Geschäftsgang befugt. Der Käufer tritt hiermit alle Ansprüche, die aus der Weiterveräußerung erwachsen sind, schon jetzt an den Lieferer ab. Die Abtretung nimmt der Lieferer hiermit an. Dies gilt auch für Waren, die verarbeitet oder verbunden wurden. Nimmt der Käufer die Forderung aus einer Weiterveräußerung eines Liefergegenstandes vom Lieferer in ein seinem Kunden bestehendes Kontokorrentverhältnis auf, so ist die Kontokorrentforderung des Käufers in voller Höhe abgetreten. Der Lieferer wird die Abtretung nicht offen legen, solange der Käufer seine Zahlungsverpflichtung erfüllt. Soweit der Lieferer dies im Einzelfall wünscht, hat der Käufer die Namen seiner Kunden zu offenbaren und diesen von der Abtretung Kenntnis zu geben. Der Käufer ist ermächtigt, die abgetretenen Forderungen aus der Weiterveräußerung selbst einzuziehen, wobei sich der Lieferer den Widerruf dieses Rechts jederzeit vorbehält.
- Die Vorbehaltsware darf nur mit vorherigen Zustimmung des Lieferers verpfändet oder als Sicherheit gegeben werden. Wird die vom Lieferer gelieferte Ware vom Käufer verarbeitet, wird die Verarbeitung für den Lieferer als Hersteller vorgenommen. Bei der Verarbeitung, Verbindung und Vermischung des gelieferten Gegenständen mit anderen Gegenständen, die nicht im Eigentum des Lieferers stehen, erwirbt der Lieferer das Miteigentum an der neuen Sache im Verhältnis des Wertes der Kaufsache (Faktura-Endbetrag einschließlich Mehrwertsteuer) zu den anderen verarbeiteten/verbundenen/vermischten Gegenständen zur Zeit der Verarbeitung, Verbindung oder Vermischung. Der Käufer verwahrt das so entstandene Alleineigentum oder Miteigentum für den Lieferer. Erfolgt die Vermischung oder Verbindung in der Weise, dass die Sache des Käufers als Hauptsache anzusehen ist, so gilt als vereinbart, dass der Käufer das anteilige Miteigentum an den Lieferer überträgt und die Sache für diesen verwahrt.
- Der Lieferer verpflichtet sich, die dem Lieferer zustehenden Sicherheiten auf Verlangen des Käufers insoweit freizugeben, als der realisierbare Wert der Sicherheiten des Lieferers die zu sichernde Forderung um mehr als 20 % übersteigt; die Auswahl der freizugebenden Sicherheiten obliegt dem Lieferer.

IV. Fristen für Lieferungen; Verzug

- Die Einhaltung von Fristen für Lieferungen setzt den rechtzeitigen Eingang sämtlicher vom Besteller zu liefernden Unterlagen, erforderlichen Genehmigungen und Freigaben, insbesondere von Plänen, sowie die Einhaltung der vereinbarten Zahlungsbedingungen und sonstigen Verpflichtungen durch den Besteller voraus. Werden diese Voraussetzungen nicht rechtzeitig erfüllt, so verlängern sich die Fristen angemessen; dies gilt nicht, wenn der Lieferer die Verzögerung zu vertreten hat.
- Ist die Nichteinhaltung der Fristen auf höhere Gewalt, z. B. Mobilienkrieg, Krieg, Aufruhr, oder auf ähnliche Ereignisse, z. B. Streik, Aussperrung, zurückzuführen, verlängern sich die Fristen angemessen.
- Kommt der Lieferer in Verzug, kann der Besteller – sofern er glaubhaft macht, dass ihm hieraus ein Schaden entstanden ist – eine Entschädigung für jede vollendekte Woche des Verzuges von je 0,5 %, insgesamt jedoch höchstens 5 % des Preises für den Teil der Lieferungen verlangen, der wegen des Verzuges nicht in zweckdienlichen Betrieb genommen werden konnte.
- Sowohl Schadensersatzansprüche des Bestellers wegen Verzögerung der Lieferung als auch Schadensersatzansprüche statt der Leistung, die über die in Nr. 3 genannten Grenzen hinausgehen, sind in allen Fällen verzögterer Lieferung, auch nach Ablauf einer om Lieferer zu vertreten ist. Eine Änderung der Beweislast zum Nachteil des Bestellers ist mit den vorstehenden Regelungen nicht verbunden.
- Der Besteller ist verpflichtet, auf Verlangen des Lieferers innerhalb einer angemessenen Frist zu erklären, ob er wegen der Verzögerung der Lieferung vom Vertrag zurücktritt oder auf der Lieferung besteht.
- Werden Versand oder Zustellung auf Wunsch des Bestellers um mehr als einen Monat nach Anzeige der Versandbereitschaft verzögert, kann dem Besteller für jeden angefangenen Monat Lagerkost in Höhe von 0,5 % des Preises der Gegenstände der Lieferungen, höchstens jedoch insgesamt 5 %, berechnet werden. Der Nachweis höherer oder niedrigerer Lagerkosten bleibt den Vertragsparteien unbenommen.

V. Gefahrübergang

- Die Gefahr geht auch bei frachtfreier Lieferung wie folgt auf den Besteller über:
 - bei Lieferungen ohne Aufstellung oder Montage, wenn sie zum Versand gebracht oder abgeholt worden sind. Auf Wunsch und Kosten des Bestellers werden Lieferungen vom Lieferer gegen die üblichen Transportrisiken versichert;
 - bei Lieferungen mit Aufstellung oder Montage am Tage der Übernahme in eigenen Betrieb oder, soweit vereinbart, nach einwandfreiem Probetrieb.
- Wenn der Versand, die Zustellung, der Beginn, die Durchführung der Aufstellung oder Montage, die Übernahme in eigenen Betrieb oder der Probetrieb aus vom Besteller zu vertretenden Gründen verzögert wird oder der Besteller aus sonstigen Gründen in Annahmeverzug kommt, so geht die Gefahr auf den Besteller über.

VI. Aufstellung und Montage

Für die Aufstellung und Montage gelten, soweit nichts anderes schriftlich vereinbart ist, folgende Bestimmungen:

- Der Besteller hat auf seine Kosten zu übernehmen und rechtzeitig zu stellen:
 - alle Erd-, Bau- und sonstigen branchenfremden Nebenarbeiten einschließlich der dazu benötigten Fach- und Hilfskräfte, Baustoffe und Werkzeuge,
 - die zur Montage und Inbetriebsetzung erforderlichen Bedarfsgegenstände und -stoffe, wie Gerüste, Hebezeuge und andere Vorrichtungen, Brennstoffe und Schmiermittel,
 - Energie und Wasser an der Verwendungsstelle einschließlich der Anschlüsse, Heizung und Beleuchtung,
 - bei der Montagestelle für die Aufbewahrung der Maschinenteile, Apparaturen, Materialien, Werkzeuge usw. genügend große, geeignete, trockene und verschließbare Räume und für das Montagepersonal angemessene Arbeits- und Aufenthaltsräume einschließlich den Umständen angemessener sanitärer Anlagen; im Übrigen hat der Besteller zum Schutz des Besitzes des Lieferers und des Montagepersonals auf der Baustelle die Maßnahmen zu treffen, die er zum Schutz des eigenen Besitzes ergreifen würde,
 - Schutzbekleidung und Schutvorrichtungen, die infolge besonderer Umstände der Montagestelle erforderlich sind.
- Vor Beginn der Montagearbeiten hat der Besteller die nötigen Angaben über die Lage verdeckt geführter Strom-, Gas-, Wasserleitungen oder ähnlicher Anlagen sowie die erforderlichen statischen Angaben unaufgefordert zur Verfügung zu stellen.
- Vor Beginn der Aufstellung oder Montage müssen sich die für die Aufnahme der Arbeiten erforderlichen Beistellungen und Gegenstände an der Aufstellungs- oder Montageliste befinden und alle Vorarbeiten vor Beginn des Aufbaues so weit fortgeschritten sein, dass die Aufstellung oder Montage vereinbarungsgemäß begonnen und ohne Unterbrechung durchgeführt werden kann. Anfuhrwege und der Aufstellungs- oder Montageplatz müssen geebnet und geräumt sein.

- Verzögern sich die Aufstellung, Montage oder Inbetriebnahme durch nicht vom Lieferer zu vertretende Umstände, so hat der Besteller in angemessenem Umfang die Kosten für Wartezeit und zusätzlich erforderliche Reisen des Lieferers oder des Montagepersonals zu tragen.
- Der Besteller hat dem Lieferer wöchentlich die Dauer der Arbeitszeit des Montagepersonals sowie die Beendigung der Aufstellung, Montage oder Inbetriebnahme unverzüglich zu bescheinigen.
- Verlangt der Lieferer nach Fertigstellung die Abnahme der Lieferung, so hat sie der Besteller innerhalb von zwei Wochen vorzunehmen. Geschieht dies nicht, so gilt die Abnahme als erfolgt. Die Abnahme gilt gleichfalls als erfolgt, wenn die Lieferung – gegebenenfalls nach Abschluss einer vereinbarten Testphase – in Gebrauch genommen worden ist.

VII. Entgegennahme

Der Besteller darf die Entgegennahme von Lieferungen wegen unerheblicher Mängel nicht verweigern.

VIII. Sachmängel

Für Sachmängel haftet der Lieferer wie folgt:

- Alle diejenigen Teile oder Leistungen sind nach Wahl des Lieferers unentgeltlich nachzubessern, neu zu liefern oder neu zu erbringen, die innerhalb der Verjährungsfrist – ohne Rücksicht auf die Betriebsdauer – einen Sachmangel aufweisen, sofern dessen Ursache bereits im Zeitpunkt des Gefahrübergangs vorlag.
- Sachmängelansprüche verjähren in 12 Monaten. Dies gilt nicht, soweit das Gesetz gemäß §§ 438 Abs. 1 Nr. 2 (Bauwerke und Sachen für Bauwerke), 479 Abs. 1 (Rückgriffsanspruch) und 634a Abs. 1 Nr. 2 (Baumüngel) BGB längere Fristen vorschreibt; sofern in Fällen der Verletzung des Lebens, des Körpers oder der Gesundheit, bei einer vorsätzlichen oder grob fahrlässigen Pflichtverletzung des Lieferers und bei arglistigem Verschweigen eines Mangels. Die gesetzlichen Regelungen über Ablaufhemmung, Hemmung und Neubeginn der Fristen bleiben unberührt.
- Der Besteller hat Sachmängel gegenüber dem Lieferer unverzüglich schriftlich zu rügen.
- Bei Mängelrügen dürfen Zahlungen des Bestellers in einem Umfang zurückgehalten werden, die in einem angemessenen Verhältnis zu den aufgetretenen Sachmängeln stehen. Der Besteller kann Zahlungen nur zurückhalten, wenn eine Mängelrüge geltend gemacht wird, über deren Berechtigung kein Zweifel bestehen kann. Erfolgte die Mängelrüge zu Unrecht, ist der Lieferer berechtigt, die ihm entstandenen Aufwendungen vom Besteller ersetzt zu verlangen.
- Zunächst ist dem Lieferer Gelegenheit zur Nacherfüllung innerhalb angemessener Frist zu gewähren.
- Schlägt die Nacherfüllung fehl, kann der Besteller – unbeschadet etwaiger Schadensersatzansprüche gemäß Art. XI – vom Vertrag zurücktreten oder die Vergütung mindern.
- Mängelansprüche bestehen nicht bei nur unerheblicher Abweichung von der vereinbarten Beschaffenheit, bei nur unerheblicher Beeinträchtigung der Brauchbarkeit, bei natürlicher Abnutzung oder Schäden, die nach dem Gefahrübergang infolge fehlerhafter oder nachlässiger Behandlung, übermäßiger Beanspruchung, ungeeigneter Betriebsmittel, mangelhafter Bauarbeiten, ungeeigneten Baugrundes oder die aufgrund besonderer äußerer Einflüsse entstehen, die nach dem Vertrag nicht vorausgesetzt sind, sowie bei nicht reproduzierbaren Softwarefehlern. Werden vom Besteller oder von Dritten unsachgemäß Änderungen oder Instanzsetzungsarbeiten vorgenommen, so bestehen für diese und die daraus entstehenden Folgen ebenfalls keine Mängelansprüche.
- Ansprüche des Bestellers wegen der zum Zweck der Nacherfüllung erforderlichen Aufwendungen, insbesondere Transport-, Wege-, Arbeits- und Materialkosten, sind ausgeschlossen, soweit die Aufwendungen sich erhöhen, weil der Gegenstand der Lieferung nachträglich an einen anderen Ort als die Niederlassung des Bestellers verbracht worden ist, es sei denn, die Verbringung entspricht seinem bestimmungsgemäßen Gebrauch.
- Rückgriffsansprüche des Bestellers gegen den Lieferer gemäß § 478 BGB (Rückgriff des Unternehmers) bestehen nur insoweit, als der Besteller mit seinem Abnehmer keine über die gesetzlichen Mängelansprüche hinausgehenden Vereinbarungen getroffen hat. Für den Umfang des Rückgriffsanspruchs des Bestellers gegen den Lieferer gemäß § 478 Abs. 2 BGB gilt ferner Nr. 8 entsprechend.
- Für Schadensersatzansprüche gilt im Übrigen Art. XI (Sonstige Schadensersatzansprüche). Weitergehende oder andere als die in diesem Art. VIII geregelten Ansprüche des Bestellers gegen den Lieferer und dessen Erfüllungsgehilfen wegen eines Sachmangels sind ausgeschlossen.

IX. Gewerbliche Schutzrechte und Urheberrechte; Rechtsmängel

- Sofern nicht anders vereinbart, ist der Lieferer verpflichtet, die Lieferung lediglich im Land des Lieferorts frei von gewerblichen Schutzrechten und Urheberrechten Dritter (im Folgenden: Schutzrechte) zu erbringen. Sofern ein Dritter wegen der Verletzung von Schutzrechten durch vom Lieferer erbrachte, vertragsgemäß gelieferte Lieferungen gegen den Besteller berechtigte Ansprüche erhebt, haftet der Lieferer gegenüber dem Besteller innerhalb der in Art. VIII Nr. 2 bestimmten Frist wie folgt:
 - Der Lieferer wird nach seiner Wahl und auf seine Kosten für die betreffenden Lieferungen entweder ein Nutzungsrecht erwerben, sie so ändern, dass das Schutzrecht nicht verletzt wird, oder austauschen. Ist dies dem Lieferer nicht zu angemessenen Bedingungen möglich, stehen dem Besteller die gesetzlichen Rücktritts- oder Minderungsrechte zu.
 - Die Pflicht des Lieferers zur Leistung von Schadensersatz richtet sich nach Art. XI.
- Die vorstehend genannten Verpflichtungen des Lieferers bestehen nur, soweit der Besteller den Lieferer über die vom Dritten geltend gemachten Ansprüche unverzüglich schriftlich verständigt, eine Verletzung nicht anerkennt und dem Lieferer alle Abwehrmaßnahmen und Vergleichsverhandlungen vorbehalten bleibt. Stellt der Besteller die Nutzung der Lieferung aus Schadensminderungs- oder sonstigen wichtigen Gründen ein, ist er verpflichtet, den Dritten darauf hinzuweisen, dass mit der Nutzungseinstellung keine Anerkennung einer Schutzrechtsverletzung verbunden ist.
- Ansprüche des Bestellers sind ferner ausgeschlossen, soweit die Schutzrechtsverletzung durch spezielle Vorgaben des Bestellers, durch eine vom Lieferer nicht voraussehbare Anwendung oder dadurch verursacht wird, dass die Lieferung vom Besteller verändert oder zusammen mit nicht vom Lieferer gelieferten Produkten eingesetzt wird.
- Im Falle von Schutzrechtsverletzungen gelten für die in Nr. 1 a) geregelten Ansprüche des Bestellers im Übrigen die Bestimmungen des Art. VIII Nr. 4, 5 und 9 entsprechend.
- Bei Vorliegen sonstiger Rechtsmängel gelten die Bestimmungen des Art. VIII entsprechend.
- Weitergehende oder andere als die in diesem Art. IX geregelten Ansprüche des Bestellers gegen den Lieferer und dessen Erfüllungsgehilfen wegen eines Rechtsmangels sind ausgeschlossen.

X. Unmöglichkeit; Vertragsanpassung

- Soweit die Lieferung unmöglich ist, ist der Besteller berechtigt, Schadensersatz zu verlangen, es sei denn, dass der Lieferer die Unmöglichkeit nicht zu vertreten hat. Jedoch beschränkt sich der Schadensersatzanspruch des Bestellers auf 10 % des Wertes desjenigen Teils der Lieferung, der wegen der Unmöglichkeit nicht in zweckdienlichen Betrieb genommen werden kann. Diese Beschränkung gilt nicht, soweit in Fällen des Vorsatzes, der groben Fahrlässigkeit oder wegen der Verletzung des Lebens, des Körpers oder der Gesundheit zwingend gehaftet wird; eine Änderung der Beweislast zum Nachteil des Bestellers ist hiermit nicht verbunden. Das Recht des Bestellers zum Rücktritt vom Vertrag bleibt unberührt.
- Falls unvorhersehbare Ereignisse im Sinne von Art. IV Nr. 2 die wirtschaftliche Bedeutung oder den Inhalt der Lieferung erheblich verändern oder auf den Betrieb des Lieferers erheblich einwirken, wird der Vertrag unter Beachtung von Treu und Glauben angemessen angepasst. Soweit dies wirtschaftlich nicht vertretbar ist, steht dem Lieferer das Recht zu, vom Vertrag zurückzutreten. Will er von diesem Rücktrittsrecht Gebrauch machen, so hat er dies nach Erkenntnis der Tragweite des Ereignisses unverzüglich dem Besteller mitzuteilen und zwar auch dann, wenn zunächst mit dem Besteller eine Verlängerung der Lieferzeit vereinbart war.

XI. Sonstige Schadensersatzansprüche

- Schadens- und Aufwendungsersatzansprüche des Bestellers (im Folgenden: Schadensersatzansprüche), gleich aus welchem Rechtsgrund, insbesondere wegen Verletzung von Pflichten aus dem Schuldbereich und aus unerlaubter Handlung, sind ausgeschlossen.
- Dies gilt nicht, soweit zwingend gehaftet wird, z. B. nach dem Produkthaftungsgesetz, in Fällen des Vorsatzes, der groben Fahrlässigkeit, wegen der Verletzung des Lebens, des Körpers oder der Gesundheit, wegen der Verletzung wesentlicher Vertragspflichten. Der Schadensersatzanspruch für die Verletzung wesentlicher Vertragspflichten ist jedoch auf den vertragstypischen, vorhersehbaren Schaden begrenzt, soweit nicht Vorsatz oder grobe Fahrlässigkeit vorliegt oder wegen der Verletzung des Lebens, des Körpers oder der Gesundheit gehaftet wird. Eine Änderung der Beweislast zum Nachteil des Bestellers ist mit den vorstehenden Regelungen nicht verbunden.
- Soweit dem Besteller nach diesem Art. XI Schadensersatzansprüche zustehen, verjähren diese mit Ablauf der für Sachmängelansprüche geltenden Verjährungsfrist gemäß Art. VIII Nr. 2. Bei Schadensersatzansprüchen nach dem Produkthaftungsgesetz gelten die gesetzlichen Verjährungsvorschriften.

XII. Gerichtsstand und anwendbares Recht

- Alleiniger Gerichtsstand ist, wenn der Besteller Kaufmann ist, bei allen aus dem Vertragsverhältnis unmittelbar oder mittelbar sich ergebenden Streitigkeiten der Sitz des Lieferers. Der Lieferer ist jedoch auch berechtigt, am Sitz des Bestellers zu klagen.
- Für die Rechtsbeziehungen im Zusammenhang mit diesem Vertrag gilt deutsches materielles Recht unter Ausschluss des Übereinkommens der Vereinten Nationen über Verträge über den internationalen Warenaufschluss (CISG).

XIII. Verbindlichkeit des Vertrages

- Der Vertrag bleibt auch bei rechtlicher Unwirksamkeit einzelner Bestimmungen in seinen übrigen Teilen verbindlich. Das gilt nicht, wenn das Festhalten an dem Vertrag eine unzumutbare Härte für eine Partei darstellen würde.
